

Acknowledgement

*First of all, I want to express my deep sense of gratitude to my research supervisor, **Dr. Subal Chandra Manna**, Associate professor, Department of Chemistry and Chemical Technology, Vidyasagar University, for the continuous support, encouragement, invaluable guidance that he provided me to develop an attitude of independent scientific career. His dynamic thinking is a great driving force and inspiration and provided opportunity to work several interesting problems which cutting across several disciplines. I have realized his art of producing best of the results from the students in a most harmonious way. Besides a successful research life he also provided me an enjoyable social life during the tenure of my research.*

I express my deepest sense of gratitude to the Honorable Vice-chancellor, Professor Ranjan Chakrabarti and Registrar Dr. Jayanta Kishore Nandi for providing various facilities.

I am thankful to Professor Sayed Sirajul Islam, Professor Braja Gopal Bag, Professor Ajay Kumar Misra, Professor Amiya Kumar Panda, Professor Sudipta Dalai, Dr. Sumita Roy, Dr. Moidul Hussain and Dr. Anirban Basu for teaching me various elements of research.

I am very much thankful to my collaborators, Dr. Horst Puschmann (University of Durham, U.K.), Dr. Valerio Bertolasi (Università di Ferrara, Italy), Dr. Ennio Zangrando (University of Trieste, Italy), Dr. Albert Figuerola (Universitat de Barcelona, Spain), Dr. Manas Kumar Santra (National Centre for Cell Science, India) for providing single crystal diffractometer, SQUID for low temperature magnetic measurement and biological study. Dr. Sunil Kumar Bhanja, Dr.

Soumitra mondal, Dr. Sujoy Bandopadhyay, Mr. Jayanta Samanta, Mr. Supriya Bhunia, Mrs. Bidisa Dutta and Mr. Arun Pal are also acknowledged.

I am also grateful to my lab mates Dr. Soumen Mistri, Apu Patra, Soumen Manna, Apurba Bhunia, Kalipada Das, Samar Dolai, Susobhan Das, Dama Soren and Manas Kumar Mahish for providing me the healthiest environment to work and for making all these years an unforgettable memory. Besides lab mates, I also thank Dr. Ipsita Kumar Sen, Subhajit Das, Arnab Paul, Byomkesh Kar, Saikat Kumar Panja, Shyamal Rana and Santanu Sarkar for their help and support.

I take this opportunity to thank Mr. Dipankar Mandal and Mrs. Anindita Maiti of USIC for their help whenever necessary. I would also like to thank all the staff members of Library, Administration, Finance, canteen and Security of Vidyasagar University for rendering their help during my work.

I am lucky to have so many friends in and away from Vidyasagar University whose company never allowed me to feel bore during the entire course of my work. I am very much thankful to Prasun Acharya, Dibyendu Mondal, Anup Bhunia, Biman Routh, Rajkumar Misra, Sukhendu Bikash Samanta, Rabindranath Samanta, Somnath Dinda, Chandan Jana, Akshay Shee, Satyaban Dandapat, Uttam Mondal, Aninda Pan, Sandip Sen, Sujoy Mukherjee and many others for making this journey so wonderful.

I am also thankful to Sri Sanat Kumar Pal, Sri Gunadhar Mridha, Sri Prangopal Mondal, Sri Biswajit Sardar, Sri Ashoke Paul and Smt. Sangita Roy for their affection, care, encouragement and motivation.

I owe a lot to my “Paul Family” for their incessant blessings, encouragement, inspiration and unceasing affection throughout my life. I dedicate this thesis to my parents, Nityananda Paul and Shila Paul. Very special thanks to my grandmother Chabi Paul for his encouragement and support.

I pay a special tribute to CSIR, Government of India, for NET fellowship and for providing financial support for my research work.

I am also thankful to Almighty God for blessings with good health and patience that lead to successful completion of this piece of work.

Many people have contributed towards the successful completion of this research work, it would be incomplete without giving due tribute to them. So I convey my heartfelt thanks to all those who directly or indirectly helped me in diverse ways that lead to completion of this doctoral thesis work.

Publications

2019

1. Structure and magnetic characterization of tetranuclear closed/double-open cubane core, and 1D polynuclear copper(II) complexes, Subal Chandra Manna, **Aparup Paul**, Ennio Zangrando, Albert Figuerola, **Journal of Solid State Chemistry**, Volume 271, March 2019, Pages 378-385.
2. Double μ_2 -(phenoxido)-bridged dinuclear and polynuclear nickel(II) complexes: Magnetic properties and DNA/protein interaction, **Aparup Paul**, Albert Figuerola, Horst Puschmann, Subal Chandra Manna, **Polyhedron**, Volume 157, 1 January 2019, Pages 39-48.

2018

3. Synthesis, crystal structure and DNA/protein binding of tetranuclear Cu(II) complexes with a double-open-cubane like core framework, **Aparup Paul**, Horst Puschmann, Subal Chandra Manna, **Polyhedron**, Volume 155, 15 November 2018, Pages 447-456.

2017

4. Structural and magnetic characterization of three tetranuclear Cu(II) complexes with face-sharing-dicubane/double-open-cubane like core framework, **Aparup Paul**, Valerio Bertolasi, Albert Figuerola, Subal Chandra Manna, **Journal of Solid State Chemistry**, Volume 249, May 2017, Pages 29-38.
5. Structural and Magnetic Characterization of Two Tetranuclear Cu(II) Complexes with Closed-Cubane-Like Core Framework, Subal Chandra Manna, Soumen Manna, **Aparup Paul**, Ennio Zangrando, Albert Figuerola, Samar Dolai, and Kalipada Das, **ChemistrySelect**, 2017, 2, 3317- 3322.
6. Manganese(IV) complex with a polydentate Schiff base ligand: synthesis, crystal structure, TDDFT calculation, electronic absorption and EPR spectral study, Soumen Manna, Soumen Mistri, Apurba Bhunia, **Aparup Paul**, Ennio Zangrando, Subal Chandra Manna, **Journal of Coordination Chemistry**, 2017, 70:2, 296-313.

2016

7. DNA/protein binding and magnetic properties of a 1D Cu(II) complex containing fumarate and tridentate Schiff base ligands, **Aparup Paul**, Albert Figuerola, Valerio

Bertolasi, Subal Chandra Manna, **Polyhedron**, Volume 119, 24 November 2016, Pages 460-470.

8. Synthesis, crystal structure, DFT/TDDFT calculation, photophysical properties and DNA binding studies of morpholino moiety ligand based two Cu(II) complexes in combination with carboxylates, **Aparup Paul**, Soumen Mistri, Apurba Bhunia, Soumen Manna, Horst Puschmann, Subal Chandra Manna, **RSC Adv.**, 2016, **6**, 60487-60501.
9. A combined experimental and theoretical investigation on the Cu(II) sensing behavior of a piperazinyl moiety based ligand, and catecholase and biological activities of its Cu(II) complex in combination with pyridine 2,5-dicarboxylate, Soumen Mistri, **Aparup Paul**, Apurba Bhunia, Rajesh Kumar Manne, Subal Chandra Manna, **Polyhedron**, Volume 104, 28 January 2016, Pages 63-72.

2015

10. Synthesis, characterization, TDDFT calculation and biological activity of tetradentate ligand based square pyramidal Cu(II) complexes, Apurba Bhunia, Soumen Manna, Soumen Mistri, **Aparup Paul**, Rajesh Kumar Manne, Manas Kumar Santra, Valerio Bertolasi and Subal Chandra Manna, **RSC Adv.**, 2015, **5**, 67727-67737.
