List of Tables	I
List of Figures	II-V
List of Abbreviations	VI-VII
1. Introduction	1-7
2. Review of Literature	8-32
3. Objective	33-34
4. Isolation and identification of <i>Vibrio parahaemolyticus</i>	
4.1 Introduction	35-37
4.2. Materials and Methods	
4.2.1. Sample collection	37-38
4.2.2. Bacterial isolates and cultivation	38-39
4.2.3. Biochemical characterization	39
4.2.4. Hemolytic activity	40
4.2.5. Genomic DNA isolation	40
4.2.6. Molecular identification by 16S rRNA gene	40-41
4.2.7. Molecular identification by <i>toxR</i> gene	41
4.2.8. DNA sequencing	42
4.3. Result	
4.3. 1. Isolation of bacteria	42-43
4.3. 2. Biochemical characterization	43-44
4.3. 2. Hemolytic activity	45
4.3. 3. Molecular identification by 16S rRNA	45-46
4.3. 4. Molecular identification by <i>toxR</i>	46
4.4. Discussion	46-49
4.5. Conclusion	49
5. Identifications of virulent genes of <i>Vibrio parahaemolyticus</i>	
5.1 Introduction	50-52
5.2. Materials and Methods	
5.2.1. Genomic DNA isolation and Virulence-related gene detection	52-53
5.2.2. Liquid-phase hemolysis assays	53-54
5.2.3. Cytotoxicity test	54
5.2.4. Gene sequencing	54-55
5.3. Result	
5.3.1. Hemolytic activity	55
5.3.2. Virulence-related gene detection	55-57
5.3.3. Liquid-phase hemolysis assays	58
5.3.4. Cytotoxicity test	59
5.4. Discussion	60-64
5.5. Conclusion	64-65
6 Genetic Diversity Study of <i>Vibrio parahaemolyticus</i>	
6.1. Introduction	66-68
6.2. Materials and Methods	
6.2.1. Phylogenetic analysis using 16S rRNA gene	68-69
6.2.2. PCR amplification and sequencing for MLST	69-70

	6.2.3. Genetic diversity study using MLST	70
	6.2.4. Sequence types and clonal complexes determination	70
	6.2.5. The phylogenetic analysis	71
	6.3 Result	
	6.3.1. Genetic diversity study using 16S rRNA	71-73
	6.3.2. Sequence diversity	73-74
	6.3.3. Sequence types and clonal complexes	74-75
	6.3.4. Geographical distribution of the STs.	76
	6.3.5. Phylogenetic analysis	76-77
	6.4 Discussion	77-80
	6.5. Conclusion	81
7.	Secretomics of <i>trh</i> positive strain of <i>Vibrio parahaemolyticus</i>	
	7.1. Introduction	82-84
	7.2. Materials and Methods	
	7.2.1. Bacterial culture and isolation of extracellular proteins	84
	7.2.2. SDS-PAGE profiling	85
	7.2.3. 2D gel electrophoresis	85-86
	7.2.4. Mass spectrometry analysis	86-88
	7.2.4. Data analysis	87-88
	7.3. Result	
	7.3.1. SDS-PAGE	88-89
	7.3.2. 2D gel electrophoresis	89-90
	6.3.3. MALDI-TOF analysis	90-92
	7.4. Discussion	92-95
	7.5. Conclusion	95
8.	Pathogenicity study of <i>Vibrio parahaemolyticus</i> in fish	
	8.1. Introduction	96-99
	8.2. Materials and Methods	
	8.2.1. Bacterial culture	98
	8.2.2. LD ₅₀ determination	98-99
	8.2.3. Histopathology	99
	8.2.4. Experimental challenge	100
	8.2.5. Innate immunity parameters	
	8.2.5.1. Respiratory burst activity	100-101
	8.2.5.2. Myeloperoxidase activity	101
	8.2.5.3. Lysozyme activity	101
	8.2.5.4. Total antiproteases activity	101-102
	8.2.5.5. Alpha (α)-2 macroglobulin activity	102
	8.2.6. Protein extraction	103
	8.2.7. SDS-PAGE	103
	8.2.8. RNA isolation and cDNA preparation	103-104
	8.2.9. Gene expression analysis	105
	8.2.10. Statistical analysis	106
	8.3. Result	
	8.3. 1. Cumulative mortality and determination of LD50	106-107
	8.3. 2. Histopathology	108-110

	8.3. 3. 1D profile of different tissue	
	8.3. 3.1. 1D profile of liver	111
	8.3. 3.2. 1D profile of kidney	112
	8.3. 3.3. 1D profile of muscle	113
	8.3. 3.4. 1D profile of serum	114
	8.3. 4. Innate immunity parameters	
	8.3. 4.1. Respiratory burst activity	115
	8.3. 4.2. Myeloperoxidase activity	115
	8.3. 4.3. Lysozyme activity	115
	8.3. 4.4. Total antiproteases activity	115
	8.3. 4.5. Alpha(α)-2 macroglobulin activity	116
	7.3.5. Gene expression profile	117-118
	8.4. Discussion	119-126
	8.5. Conclusion	126
9.	<i>In-silico</i> structural and functional analysis of TDH and TRH gene in <i>Vibrio Parahaemolyticus</i>	
	9.1. Introduction	127-130
	9.2. Materials and Methods	
	9.2.1. Bacterial culture, DNA isolation, and amplification of the <i>tdh</i> and <i>trh</i> gene	130-131
	9.2.2. Sequencing of the amplified <i>tdh</i> and <i>trh</i> gene	131
	9.2.3. Primary information of Tdh and Trh <i>Vibrio</i> sp	131
	9.2.4. Sequence based analysis	131-132
	9.2.5. Multiple sequence alignment and phylogenetic analysis	132
	9.2.6. Structure prediction through homology modeling:	132
	9.2.7. Structural quality assessment	133
	9.2.8. Molecular dynamics (MD) simulations	133-134
	9.2.9. Pocket identification	134
	9.3. Result	
	9.3.1. Amplification and sequencing of the full-length <i>tdh</i> and <i>trh</i> gene	134-135
	9.3.2. Sequence based analysis	135-138
	9.3.3. Multiple sequence analysis and phylogenetic analysis	138-140
	9.3.4. Structure prediction through homology modeling:	141
	9.3.5. Structural quality assessment	142
	9.3.6. Molecular dynamics (MD) simulations	143
	9.3.7. Pocket identification	144-149
	9.4. Discussion	149-153
	9.5. Conclusion	153-154
10.	Conclusion	156-157
11	Summary	158-162
12	References	163-213
