<i>Chapter-1</i>	
<b>1.0 Introduction</b>	1
1.1 Different forms of arsenic	1
1.2. Source of arsenic	1
1.3. Global scenario of Arsenic	2
1.3.1. In India and Bangladesh	2
1.3.2. Arsenic contamination in West Bengal State	2
1.4. Toxic effect of arsenic	2
1.4.1. Arsenic toxicity in animals	2
1.5. Arsenic induced oxidative stress	3
1.6. Toxicity of arsenic in different organs	4
1.6.1. Toxic effect of arsenic on metabolic system	4
1.6.2. Arsenic exposure and human carcinogenesis	5
1.7. Effect of arsenic in reproductive organs	6
1.7.1. Toxic effect of arsenic on Male Reproduction	6
1.7.2. Toxic effect of arsenic on Female Reproduction	7
1.8. Biotransformation of arsenicals	8
1.9. Background: Therapeutic approach against arsenic toxicity	8
<i>Chapter-2</i>	
<b>2.0 Aims and Objective</b>	13
<i>Chapter-3</i>	
<b>3.0 Materials and Methods</b>	14
3.1. Chemicals and reagents	14

3.2.	Isolation and purification of Pectic Polysaccharide	14
3.3.	Preparation of arsenic with Pectic Polysaccharide	15
3.4.	Spectrum analysis of CCPS and arsenic-CCPS association	15
	3.4.1. UV spectroscopic analysis	15
	3.4.2. FTIR spectroscopic analysis	15
	3.4.3. X-ray diffraction analysis	15
	3.4.4. <sup>1</sup> H NMR study	16
	3.4.5. Electron microscopy study	16
3.5.	Methods of curcumin encapsulated chitosan nanoparticles (ECNPs)	16
	3.5.1. Preparation of Chitosan nanoparticles	16
	3.5.2. Preparation of encapsulated curcumin chitosan nanoparticles	16
	3.5.3. Nanoparticles characterization	17
	3.5.4. Particle size measurement by TEM	17
3.6.	Animal selection and treatment	17
3.7.	Vaginal smear investigation	18
3.8.	Assay of serum total protein	18
3.9.	Assessment of General Toxicity: Liver Function test	19
	3.9.1. Estimation of serum creatinine	19
	3.9.2. Estimation of serum SGPT	19
	3.9.3. Estimation of serum SGOT	19
3.10.	Assessment of General Toxicity: Lipid Function test	19
	3.10.1. Estimation of Total Cholesterol (Oxidase method)	20
	3.10.2. Estimation of Triglycerides	20
	3.10.3. Estimation of HDL-cholesterol	20
	3.10.4. Estimation of LDL-cholesterol	20
3.11.	MDA and CD assay	20
3.12.	Estimation of NPSH	21
3.13.	Spectrophotometric assay of SOD, Catalase, Px and Gpx	21
3.14.	Assessment of SOD, Catalase, Px and GPx by gel electrophoresis	22
3.15.	Spectrophotometry assay of serum LDH	23
3.16.	Determination of serum LDH	23
3.17.	Study of DNA Fragmentation	23
3.18.	Comet assay	24

3.19.	Ovarian $\Delta^5$ , 3 $\beta$ -HSD and 17 $\beta$ -HSD activities	24
3.20.	Determination of serum Vitamin B <sub>12</sub> , Folic Acid and Vitamin-C: HPLC	25
3.21.	Assessments of Vit-B <sub>12</sub> , B <sub>9</sub> and Hcy: ELISA	25
3.22.	Assessments of Serum Hormone analysis	26
3.23.	Assessments of Esr-1, NF- $\kappa$ B, TNF- $\alpha$ , IL-6 and MT-1	26
3.24.	Uterine-Ovarian histopathology	27
3.25.	Calculation and Statistical analysis	27
<i>Chapter-4</i>		
<b>4.0.</b>	<b>Study Design</b>	<b>29</b>
<i>Chapter-5</i>		
<b>5.0.</b>	<b>EXPERIMENT-1</b>	<b>31</b>
<b>Extraction of the pectic polysaccharide (CCPS) from <i>Momordica charantia</i> (Bitter gourd) and its characterization.</b>		
5.1.	Objective of the investigation	31
5.2.	Results	31
5.2.1.	UV-Visible spectroscopic study	31
5.2.2.	FT-IR Spectroscopic study	31
5.2.3.	XRD spectroscopy	32
5.2.4.	<sup>1</sup> H NMR spectroscopy	33
5.2.5.	SEM & TEM study	33
5.3.	Discussion	36
<i>Chapter-6</i>		
<b>6.0</b>	<b>EXPERIMENT-2A</b>	<b>39</b>
<b>Efficacy testing of CCPS and curcumin on arsenic-exposed liver slices maintained <i>in vitro</i> condition.</b>		
6.2A.1.	Objective of the investigation	39
6.2A.2.	Experimental design	39
6.2A.3.	Results	39
6.2A.3.1.	Assay of antioxidant enzymes by spectrophotometry	39
6.2A.3.2.	Zymogram of antioxidant enzymes	40
<b>6.0</b>	<b>EXPERIMENT-2B</b>	<b>40</b>
<b>Examine the direct combined effects of CCPS, curcumin and CCPS-curcumin on</b>		

**liver tissue antioxidant status against selective dose of sodium arsenite *in vitro*.**

6.2B.1.	Objective of the investigation	40
6.2B.2.	Experimental design	40
6.2B.3.	Results	41
	6.2B.3.1. Assay of lipid peroxidation levels in duration dependent	41
	6.2B.3.2. Status of antioxidant enzymes by spectrophotometry	42
	6.2B.3.3. Zymogram of antioxidant enzymes	42
	6.2B.3.4. LDH status	43
	6.2B.3.5. DNA fragmentation assay	43
	6.2B.3.6. Comet assay	43
6.4.	Discussion	50

*Chapter-7*

**7.0. EXPERIMENT-3** 56

**Protective effect of Curcumin with different doses against repro-toxicity ailments induced by sodium arsenite in female rats *in-vivo*.**

7.1.	Objective of the investigation	56
7.2.	Experimental design	56
7.3.	Results	57
	7.3.1. Body Growth and Organ Weights	57
	7.3.2. Effect of curcumin on estrous cycle pattern	58
	7.3.3. Uterine lipid peroxidation and CD levels	58
	7.3.4. Uterine enzymatic antioxidant expression	58
	7.3.5. Ovarian steroidogenesis, gonadotropins and estradiol	59
7.4.	Discussion	65

*Chapter-8*

**8.0. EXPERIMENT-4** 70

**Protective effect of CCPS with different doses against repro-toxicity ailments induced by sodium arsenite in female rats *in-vivo*.**

8.1.	Objective of the investigation	70
8.2.	Experimental design	70
8.3.	Results	71
	8.3.1 General growth of the animals and reproductive organ weights	71
	8.3.2. Pattern of estrous cycle	71
	8.3.3. Uterine lipid peroxidation and CD levels	72

8.3.4. Uterine enzymatic antioxidant activities	72
8.3.5. Ovarian steroidogenesis, gonadotropins and estradiol	72
8.4. Discussion	78
<i>Chapter-9</i>	
<b>9.0. EXPERIMENT-5</b>	82
<b>Remedial effect of curcumin and CCPS against sodium arsenite mediated female repro-toxicity by <i>in-vivo</i>.</b>	
9.1. Objective of the investigation	82
9.2. Experimental design	82
9.3. Results	83
9.3.1. Body growth and organ weights	83
9.3.2. Estrous cycle study	84
9.3.3. MDA and CD assay	84
9.3.4. Uterine enzymatic antioxidant activity	84
9.3.5. Serum LDH study	85
9.3.6. DNA and comet assay	85
9.3.7. Serum vitamins and Hcy level	85
9.3.8. Ovarian steroidogenesis, gonadotrophins and estradiol level	85
9.3.9. Inflammatory markers and MT-1 level	86
9.3.10. Ovarian and uterine histo-morphology	86
9.4. Discussion	98
<i>Chapter-10</i>	
<b>10.0. EXPERIMENT-6</b>	
<b>Curative effect of CCPS against sodium arsenite mediated female repro-toxicity by <i>in-vivo</i>.</b>	104
10.1. Objective of the investigation	104
10.2. Experimental design	104
10.3. Results	105
10.3.1 Effect of CCPS on Body Growth and Organ Weights	105
10.3.2. Effect of CCPS on estrous cycle pattern	105
10.3.3. Liver and kidney function	106
10.3.4. Effect of post treatment of CCPS	106

on sex organ's lipid peroxidation	
10.3.5. Effect of CCPS post treatment on sex organ's antioxidant activities	106
10.3.6. Effect of CCPS on serum LDH	107
10.3.7. Effect of CCPS on circulating vitamins and Hcy	107
10.3.8. Effect of CCPS on gonadotrophin hormones, ovarian steroidogenesis and Esr-1	107
10.3.9. Effect of CCPS on inflammatory markers and MT-1 level	108
10.3.10. Effect of CCPS on apoptotic and tumerogenic expression in uterus	108
10.3.11. Effect of CCPS on apoptotic and necrotic factor at gene level in uterus	108
10.3.12. Effect of CCPS on histo-morphology	108
10.3.13. Effect of dietary CCPS on infertility	109
10.4. Discussion	124
<i>Chapter-11</i>	
<b>11.0. EXPERIMENT-7</b>	131
<b>Preparation of curcumin encapsulated chitosan nanoparticles (ECNPs) and its characterization.</b>	131
11.1. Objective of the investigation	131
11.2. Results	131
11.2.1. Solubility of Nanoparticles	131
11.2.2. FT-IR Spectroscopic study	131
11.2.3. Sizes of nanoparticles	132
11.2.4. XRD analysis	132
11.3. Discussion	134
<i>Chapter-12</i>	
<b>12.0. EXPERIMENT-8</b>	137
<b>Curative effect of different doses of ECNPs against sodium arsenite mediated female repro-toxicity by <i>in-vivo</i></b>	
12.1. Objective of the investigation	137
12.2. Experimental design	137

12.3.	Results	138
12.3.1.	Body growth and organ weights	138
12.3.2.	Pattern of estrous cycle	139
12.3.3.	Effect of ECNPs of lipid peroxidation and CD levels	139
12.3.4.	Effect of ECNPs on uterine SOD and catalase activities	139
12.3.5.	Effect of ECNPs on ovarian steroidogenesis, gonadotrophin and estradiol	140
12.4.	Discussion	146
<b>13.0.</b>	<b>Conclusion</b>	150
<b>14.0.</b>	<b>Summary</b>	153
<b>15.0.</b>	<b>Bibliography</b>	156
<b>16.0.</b>	<b>List of publication</b>	194
