List of Figures

1.1 Standard color images (512×512) used in the thesis 28

3.1 Schematic diagram of data embedding procedure in SSGN 50
3.2 Illustration of hidden data retrieval and cover image recovery in SSGN 52
3.3 Comparison graph of SSGN with existing schemes in terms of PSNR (dB) . . . 55
3.4 Comparison graph of SSGN with varying data embedding capacity 56
3.5 Results of brute force attacks with unknown weighted matrix, threshold value and reference table in SSGN 58
3.6 Numerical illustration of embedding process in SSPVD 60
3.7 Numerical illustration of extraction process in SSPVD 63
3.8 Comparison graph with other existing schemes in terms of PSNR (dB) and embedding capacity 65
3.9 Histogram difference of cover and stego image in SSPVD 67

4.1 Schematic diagram of data embedding process in DSGN 77
4.2 Illustration of hidden data retrieval and cover image recovery in DSGN 79
4.3 Experimental results of brute force attack with unknown weighted matrix and shared secret key in DSGN 83
4.4 Schematic diagram of data embedding process in DSWM 88
4.5 Schematic diagram of data extraction process in DSWM 92
4.6 Comparison graph with existing schemes in terms of PSNR (dB) 99
4.7 Comparison graph with existing schemes in terms of payload (bits) 100
4.8 Secret information extraction from stego image when tampered by blurring, brightening and contrast stretching in DSWM 101

4.9 Secret information extraction from stego image when tampered by cropping, median filtering and opaque in DSWM 102
4.10 Secret information extraction from stego image when tampered by noise, rotation and jpeg compression in DSWM 103
4.11 Experimental results of brute force attack with wrong weighted matrix and secret key in DSWM 105

5.1 Schematic diagram of data embedding process in SSDCT 116
5.2 Schematic diagram of data extraction process in SSDCT 119
5.3 Comparison graph with existing DCT based schemes in terms of average PSNR (dB) in SSDCT 122
5.4 Comparison of PSNR (dB) with respect to capacity and different quality factor in SSDCT 123
5.5 Results of brute force attacks with unknown weighted matrix and secret key in SSDCT 124
5.6 Schematic diagram of data embedding process in SSDWT 128
5.7 Schematic diagram of data extraction process in SSDWT 131
5.8 Comparison graph of SSDWTwith existing DWT based schemes in terms of average PSNR (dB) 133
5.9 Comparison graph of SSDWTwith existing DWT based schemes in terms of average SSIM 134

6.1 Comparison of the SSGN and SSPVD schemes in terms of PSNR (dB) and payload (bpp) 141
6.2 Comparison of the DSGN and DSWM schemes in terms of PSNR (dB) and payload (bpp) 142
6.3 Comparison of the SSDCT and SSDWT schemes in terms of PSNR (dB) and payload (bpp) 143
6.4 Graphical representation of proposed schemes with respect to PSNR (dB) . . . 144
6.5 Graphical representation of proposed schemes with respect to payload (bpp) . . 144
6.6 Graphical representation of proposed schemes with respect to SSIM 145
6.7 Graphical representation of proposed schemes with respect to NCC 145

6.8 Graphical representation of proposed schemes with respect to BER 145
6.9 Graphical representation of proposed schemes with respect to Q-Index 146
