

Chapter 1 Introduction and Literature Review

Page no. 1-25

Table 1.1	Demand and production of fish in West Bengal (2009-16)	1
Table 1.2	Overview of dredged material containment area site selection factors	11
Table 1.3	Environmental parameters and suitable criteria for aquaculture	11
Table 1.4	Electromagnetic radiation (EMR) and their principal	16
Table 1.5	LU/LC classification system	19

Chapter 2 About Study Area

26-41

Table 2.1	Population status of Purba Medinipur district	26
Table 2.2	Administrative set up of Purba Medinipur district	27
Table 2.3	Main drainage system of the Purba Medinipur district	31
Table 2.4	Coastal soil composition of Purba Medinipur district	34
Table 2.5	Climatic seasons of the year	34
Table 2.6	Year wise monthly temperature ($^{\circ}$ C) in Purba Medinipur district	34
Table 2.7	Year wise monthly rainfall (mm) in Purba Medinipur district	35
Table 2.8	Detail LU/LC information of the study area, 2012	36
Table 2.9	Statistical overview of fisheries sector of Purba Medinipur district	40

Chapter 3 Materials and Methods

42-49

Table 3.1	Satellite data derived information	42
Table 3.2	Topographic and Collateral data	42
Table 3.3	Detail band specification of Sentinel-2 data	43
Table 3.4	Detail band specification of Landsat 8 data	44

Chapter 4 Structural Classification and Monitoring of Impounded Water bodies

50-66

Table 4.1	Category wise impounded water body statistic of the district (area in ha.)	55
Table 4.2	Growth rate (GR) of impounded water body of Purba Medinipur district	55
Table 4.3	Calculated values for absolute entropy	66

Chapter 5 Fish Diversity Status

67-79

Table 5.1	Available fish list of Purba Medinipur District, West Bengal	70
Table 5.2	Order wise fish diversity of Purba Medinipur district	71
Table 5.3	Family wise fish diversity of Purba Medinipur district	72
Table 5.4	Locally endangered fish species of Purba Medinipur district	74

Chapter 6 Site Suitability Analysis

		80-106
Table 6.1	Classification criteria and suitability rating of sub-model, WA	83
Table 6.2	Classification criteria and suitability rating of sub-model, WQ	86
Table 6.3	Classification criteria and suitability rating of sub-model, Slope and Soil	89
Table 6.4	Classification criteria and suitability rating of sub-model, LT and PI	90
Table 6.5	Theme weighted of each sub-model, SSFF	90
Table 6.6	Theme weighted of each sub-model, SSCFF	93
Table 6.7	Block wise average soil properties of Purba Medinipur district	95
Table 6.8	Statistical data of average water quality, Purba Medinipur district	95
Table 6.9	Detail of suitability pattern of the district	104
