

Contents

1	Introduction	1
1.1	Inventory	1
1.2	Literature overview about inventory	4
1.3	Inventory management	5
1.4	Demand	7
1.5	Inventory costs	9
1.6	Production	18
1.7	Trade-credit policy	19
1.8	Time horizon	20
1.9	Price-discount	20
1.10	Deterioration	21
1.11	Highlights of present research works	22
2	Variable demand in a warehouse model	25
2.1	Introduction	25
2.2	Mathematical model	30
2.3	Numerical examples	52

2.4	Concluding remarks and future works	66
2.5	Appendices	66
3	Price-discount and delay-in-payments in an inventory model	69
3.1	Introduction	69
3.2	Mathematical model	75
3.3	Numerical examples	82
3.4	Concluding remarks and future works	93
3.5	Appendices	93
4	Deterioration of fixed lifetime products in an inventory model	97
4.1	Introduction	97
4.2	Mathematical model	103
4.3	Numerical examples	114
4.4	Concluding remarks and future works	124
4.5	Appendices	124
5	Trade-credit in an economic production quantity model	135
5.1	Introduction	135
5.2	Mathematical model	140
5.3	Numerical examples	152
5.4	Concluding remarks and future works	168
5.5	Appendix	169
6	Inspection errors for an imperfect production system	177
6.1	Introduction	177

6.2	Mathematical model	184
6.3	Numerical examples	192
6.4	Concluding remarks and future works	203
7	An integrated-inventory model with environmental issue	205
7.1	Introduction	205
7.2	Mathematical model	211
7.3	Solution methodology	218
7.4	Numerical example	224
7.5	Concluding remarks and future works	233
7.6	Appendix	234
8	Integrated-inventory model with stackelberg game	235
8.1	Introduction	235
8.2	Mathematical model	241
8.3	Stackelberg approach	251
8.4	Numerical example without Stackelberg approach	253
8.5	Numerical example by using Stackelberg approach	259
8.6	Concluding remarks and future works	269
8.7	Appendices	270
9	Conclusions	273
10	Summary	277
11	Bibliography	279
