

# List of Figures

1.1	The categorization of multi-criteria FLPs. . . . .	4
1.2	Global carbon emission by different economic sectors in 2016-2017 <sup>4</sup> (MMT: Million Metric Tones). . . . .	7
2.1	Pictorial representation of T-LP. . . . .	26
2.2	Performance of Exact approach. . . . .	36
2.3	Performance of Loc-Alloc heuristic. . . . .	37
2.4	Comparison between the obtained results. . . . .	37
3.1	Network for FCT-LP. . . . .	40
3.2	Schematic diagram of proposed approach for solving FCT-LP. . . . .	46
3.3	Performance of the approximation approach. . . . .	50
3.4	The existing and potential facility sites in Experimental design. . . . .	51
4.1	Pictorial diagram of ST-LP. . . . .	55
4.2	Performance of both the heuristic approaches. . . . .	67
4.3	The existing and potential facilities in the example. . . . .	67
5.1	Network for MOT-LP. . . . .	71
5.2	The solution concept of a multi-objective optimization. . . . .	76
5.3	Graphical representation of the proposed hybrid approach for example. . . . .	87
5.4	The existing and optimal potential facilities in example. . . . .	87
6.1	Pictorial representation of MOST-LP. . . . .	93
6.2	The solution procedure of a multi-objective decision making problem. . . . .	100
6.3	The locations of existing and potential facilities in the example. . . . .	108
7.1	Schematic diagram of the overall scenario. . . . .	124
7.2	Graphical representation of the global criterion for Example 1. . . . .	128
7.3	Pictorial diagram of the fuzzy programming for Example 2. . . . .	128
