Abstract i

List of Tables ix

List of Figures x

List of Abbreviations xv

1 Introduction 1

1.1 Overview 2

1.2 Literature Review 3

1.2.1 Target Learning, Detection and Tracking 3

1.2.2 Electro-optic Tracking Systems Prioritization and Clustering 4

1.2.3 Radar Systems Measurementt Accuracy Factors, Prioritization and Clustering 7

1.2.4 Passive Target Tracking System, Localization Accuracy and Prioritization 10

1.2.5 Brief Review of Real Time Multi-channel Remote Visualization System 11

1.3 Problem domain 12
1.3.1 Electro-Optic Tracking Sensors 12
1.3.2 Tracking Radar System 13
1.3.3 Passive Target Tracking System 15
1.3.4 Multi Sensor Track Data Generator 15
1.3.5 Real-time Multi-Channel Remote Visualization System . . 16
1.4 Motivation and Objective of the Thesis 17
1.5 Contribution of the Thesis 18
1.5.1 Prioritization and Elimination of erroneous sensor using perpendicular distance method 19
1.5.2 Application of clustering algorithm for the elimination of erroneous sensor 19
1.5.3 Improvement of object location measurement accuracy with triangulation and Clustering techniques 20
1.5.4 Factors and their impacts in Radar measurement accuracy 20
1.5.5 Clustering technique for elimination of erroneous measurement and improvement of accuracy 21
1.5.6 Prioritization of passive target tracking receivers for minimum possible error boundary hence improves accuracy . 21
1.5.7 Multi Sensor Track Data Generator 22
1.5.8 Real-time multi channel remote visualization system . . . 23
1.6 Organization of Thesis 23

2 Research Methodology **27**

2.1 Basic working principle of Electro-Optical Tracking System . . . 28
2.2 Basic working principle of Radar System 30

2.3 Basic working principle of Passive Target Tracking System 32
2.4 Co-ordinate systems and transformations 33
2.4.1 ENU Coordinate System 33
2.4.2 ECEF Coordinate System 34
2.4.3 Cartesian and spherical coordinates: 34
2.5 Three Dimensional Triangulation Algorithm 36
2.6 Data Fusion 38
2.7 Clustering Algorithm applicable on tracked data 38

3 Electro-Optical Tracking System 42

3.1 Model-1: Prioritization of Electro-Optic Sensors to Track and Improve Accuracy of Moving Object Position 43
3.1.1 Introduction 44
3.1.2 Proposed Scheme 45
3.1.3 Result and Analysis 52
3.1.4 Findings and Discussion 64
3.2 Model-2: Improvement in the Accuracy of the Moving Object Position by Eliminating Erroneous Sensors using Clustering Approach 66
3.2.1 Introduction 67
3.2.2 Proposed Scheme 68
3.2.3 Results and Analysis 69
3.2.4 Findings and Discussion 78
3.3 Model-3: Multi Sensor Data Fusion Technique for Target Tracking Based on the Combination of Triangulation Method and K-means Algorithm 80
3.3.1 Introduction 81

3.3.2 Proposed Scheme 82
3.3.3 Results and Analysis 83
3.3.4 Findings and Discussion 91

4 Tracking Radar System 92

4.1 Analysis of Factors and their Impacts in Measurement Accuracy and Prioritisation of Radars 93
4.1.1 Introduction 93
4.1.2 Factors of Measurement Accuracy 94
4.1.3 Findings and Discussion 101
4.2 Model-4: Multiple Radar Data Fusion to Improve the Accuracy in Position Measurement Based on Clustering Algorithm 103
4.2.1 Introduction 104
4.2.2 Proposed Scheme 105
4.2.3 Result and Analysis 109
4.2.4 Finding and Discussion 119

5 Passive Target Tracking System 121

5.1 Model-5: Prioritization of Receivers for Minimum Possible Error Boundary in Time Difference of Arrival Algorithm 122
5.1.1 Introduction 123
5.1.2 TDOA Algorithm for Position Measurement 124
5.1.3 Result and Analysis 131
5.1.4 Finding and Discussion 137

6 Multi-sensor Track Data Generator and Real-time Visualization System 139

6.1 Model-6: Multi-Sensor Track Data Generator Design and its Challenges . . . 140
6.1.1 Introduction . . . 141
6.1.2 Requirements specifications . . . 143
6.1.3 Context and Data Flow Diagram . . . 144
6.1.4 Detailed design . . . 145
6.1.5 Testing . . . 155
6.1.6 Finding and Discussion . . . 159
6.2 Model-7: Real-time Multi Channel Remote Monitoring System . . . 160
6.2.1 Introduction . . . 161
6.2.2 Real-time Display Sender (RTDS) System . . . 163
6.2.3 Display on Demand (DoD) System . . . 167
6.2.4 Implementation . . . 170
6.2.5 Testing . . . 173
6.2.6 Finding and Discussion . . . 174

7 Conclusion and Future Scope **176**
7.1 Summary and conclusion . . . 177
7.2 Limitations . . . 178
7.3 Future Scope . . . 178
