Contents

Chapter 1 Introduction and Literature Survey 1
1.1 Introduction 1
1.2 Basic information 2
1.2.1 Prey-predator relationship 2
1.2.2 Prey-predator model 3
1.2.3 Population 3
1.2.4 Equilibrium point 6
1.2.5 Stability 7
1.2.6 Bifurcation 8
1.2.7 Life cycle 10
1.2.8 Reserve region 10
1.2.9 Functional response 11
1.2.10 Routh-Hurwitz conditions 13
1.3 Literature survey 14
1.4 Objective and Scope of the Thesis 19
1.5 Organization of the Thesis 20

Chapter 2 Analysis of prey-predator three species models with vertebral and invertebral predators 27
2.1 Introduction 27
2.2 Notations 29
2.3 Analysis of the model at its interior equilibrium . . . 30
2.4 Boundedness 31

2.5 Local Stability 32
2.6 Global Stability 33
2.7 Numerical Simulation 36
2.8 Chapter Summary 37

Chapter 3 Effects on prey-predator with different functional responses 41
3.1 Introduction 41
3.2 Notation 42
3.3 Mathematical model 43
3.4 Local stability 44
3.5 Global stability 48
3.6 Optimal Control 52
3.7 Numerical simulation 54
3.8 Chapter Summary 56

Chapter 4 Analysis of prey-predator three species fishery model with harvesting including prey refuge and migration 63
4.1 Introduction 64
4.2 Notation 65
4.3 Formulation of the model 65
4.4 Equilibria and their existence criteria 67
4.5 Boundedness 68
4.6 Local Stability 69
4.7 Global Stability 72
4.8 Optimal Control 75
4.9 Numerical Simulation 77
4.10 Chapter Summery 79
4.11 Appendix 80

Chapter 5 Prey-predator model with migration and harvesting 91
5.1 Introduction 92
5.2 Notation 94
5.3 Mathematical model 94
5.4 Equilibria and their existence criteria 97
5.5 Local stability 98
5.6 Optimal control 101
5.7 Numerical simulation 103
5.8 Chapter Summary 103

Chapter 6 Holling-Tanner model with Beddington-DeAngelis functional response and time delay introducing harvesting . . . 107
6.1 Introduction . . . 108
6.2 Notation . . . 110
6.3 Equilibria and their existence criteria . . . 110
6.4 Boundedness . . . 111
6.5 Local stability and Hopf bifurcation analysis . . . 112
6.6 Direction and stability of Hopf bifurcation . . . 115
6.7 Bionomic equilibrium and optimal control . . . 119
6.8 Numerical simulation . . . 121
6.9 Chapter Summary . . . 122

Chapter 7 Stage structure predator model with two preys . . . 127
7.1 Introduction . . . 127
7.2 Notation . . . 129
7.3 Mathematical model . . . 129
7.4 Equilibrium point, Positivity and Boundedness . . . 130
7.5 Stability analysis . . . 131
7.6 Numerical Simulation . . . 135
7.7 Chapter Summary . . . 136

Chapter 8 Conclusion and Scope of Future Studies . . . 141
8.1 Conclusion . . . 141
8.2 Future Studies . . . 143

List of References . . . 145
