List of Figures

1.1 Various uncertainties and their solving tools 2
1.2 Evolution of soft set theory 4
1.3 Graphical representation of a CFS 7
1.4 Description of a soft set through Example 1.1 9

2.1 Schematic framework of our proposed approach 29
2.2 Key features of Algorithm III and Algorithm IV 34
2.3 Supply chain of a textile industry 45
2.4 Criteria for sustainable supplier selection 45

4.1 Rating of the linguistic variables by using a linguistic scale function 71
4.2 Flow chart of our proposed algorithm 87
4.3 The performance measure of these two approaches 93
4.4 Hierarchical structure of this plant location selection problem 95

5.1 Graphical representation of a GTrIFN 102
5.2 Graphical representation of six linguistic terms by GTrIFNs 104

6.1 Graphical representation of a T2FS 122
6.2 Graphical representation of a TrIT2FN 123

7.1 Aggregation of k complex fuzzy soft sets 152
7.2 Schematic framework of our proposed approach 158
7.3 Sensitivity analysis based on α for Example 7.3 175
7.4 Sensitivity analysis based on α for Example 7.4 176

8.1 Venn diagram of a CNN 187
8.2 Complex neutrosophic soft ideal solution 192
8.3 Graphical representation of CNNs 192
8.4 Flowchart of our proposed approach 204
8.5 Modeling framework of case study 8.7.1 206
8.6 Modeling framework of case study 8.7.3 215
8.7 Sensitivity analysis based on Example 8.4 218

8.8 Sensitivity analysis based on Example 8.5 218
8.9 Sensitivity analysis based on Example 8.6 219
8.10 Comparative analysis 219
