

### **3. AIMS AND OBJECTIVES**

The objectives of my work based on:

1. To study the industrial effluents and their impact on aquatic organisms.
2. To analyze the physico-chemical parameters of soil and water in three places of river mouth where industrial effluents are added.
3. To study the phytoplankton and zooplankton diversity in different regions of river.
4. To survey the varieties of fishes found in the mouth of Haldi river.
