## **List of Figures**

List	Page No.
Fig. 1 (General Introduction): Adult healthy indigenous Clarias batrachus.	03
Fig. 1 (Review of Literature): Genes related to potential probiotic properties.	12
Fig. 2: Diagram for screening of autochthonous probiotic strain for <i>C. batrachus</i> .	21
<b>Fig. 1.1:</b> Geographical location of the study area and sample collection: (A) Map of India; (B) Map of West Bengal; (C) Map showing the position of Ramsagar in Bankura district; (D) Study pond; (E) Collection of water and mud samples; (F) Collection of plankton through hand plankton net.	24
<b>Fig. 1.2:</b> The contour plot showing impact of physico-chemical parameters on the bacterial load of <i>C. batrachus</i> culture pond.	38
Fig. 1.3: Photograph of zooplankton observed in <i>C. batrachus</i> culture pond.	40
Fig. 1.4: Photograph of phytoplankton observed in <i>C. batrachus</i> culture pond.	42
<b>Fig. 2.A.1:</b> Isolation of bacteria from the intestine of <i>C. batrachus</i> : (A) Dissection of the ventral surface; (B) Intestinal tract of <i>C. batrachus</i> ; (C) Homogenization of the intestinal content.	48
<b>Fig. 2.A.2:</b> Antagonistic activity of bacterial isolates PKA17, PKA18 and PKA19 against pathogenic (A) <i>V. harveyi</i> (B) <i>V. vulnificus</i> (C) <i>V. parahaemolyticus</i> .	65
<b>Fig. 2.A.3:</b> Growth of selected bacterial isolates of <i>C. batrachus</i> at various temperatures in tryptone soya broth media at pH 7 under shaking (100 rpm) condition.	66
<b>Fig. 2.A.4:</b> Growth of selected bacterial isolates of <i>C. batrachus</i> at various pH in tryptone soya broth media at optimized temperature under shaking (100 rpm) condition.	67
<b>Fig. 2.A.5:</b> Growth of selected bacterial isolates of <i>C. batrachus</i> at various salt concentrations in tryptone soya broth media at optimized temperature and pH under shaking (100 rpm) condition.	67
<b>Fig. 2.A.6:</b> Effect of cultivation period on growth of PKA17, PKA18 and PKA19 in TSB at 37 °C at optimized pH under shaking (100 rpm) condition.	68
Fig. 2.A.7: Growth and clear zone production of bacterial isolates on Casein Hydrolysate agar medium.	71

<b>Fig. 2.A.8:</b> Light microscopic view: (A) PKA17; (B) PKA18; (C) PKA19 at 1000X total magnification.	71
<b>Fig. 2.A.9:</b> Agarose gel analysis of molecular weight of PCR products of 16S rDNA of PKA17, PKA18 and PKA19 bacterial isolates of <i>C. batrachus</i> (The three amplified 16S rDNA products were run separately parallel to the ladder lane and ladder lane contained standard molecular weight marker DNA).	73
<b>Fig. 2.A.10:</b> Phylogenetic analysis based on 16s rDNA sequencing of isolate PKA17 and related bacteria showing similarity with <i>Lysinibacillus sphaericus</i> OUG29GKBB (AccessionNo.KM972671.1).	73
<b>Fig. 2.A.11:</b> Phylogenetic analysis based on 16s rDNA sequencing of isolate PKA18 and related bacteria showing similarity with <i>Bacillus cereus</i> strain Gut16 (Accession No.KU156696.1).	74
<b>Fig. 2.A.12:</b> Phylogenetic analysis based on 16s rDNA sequencing of isolate PKA19 and related bacteria showing similarity with <i>Bacillus thuringiensis</i> Bt 53 (Accession No. KY784654.1).	74
<b>Fig. 2.A.13:</b> Scanning electron micrograph: (a) Isolated form of <i>L. sphaericus</i> PKA17; (b) Colonial growth of <i>L. sphaericus</i> PKA17; (c) Isolated form of <i>B. cereus</i> PKA18; (d) Colonial growth of <i>B. cereus</i> PKA18; (e) Isolated form of <i>B. thuringiensis</i> PKA19; (f) Colonial growth of <i>B. thuringiensis</i> PKA19.	76
<b>Fig. 2.A.14:</b> Antibiotic susceptibility test of bacterial isolates: (A) <i>L. sphaericus</i> PKA17 (B) <i>B. cereus</i> PKA18 and (C) <i>B. thuringiensis</i> PKA19 against 1. Streptomycin (SM); 2. Clindamycin (CD); 3. Gentamycin (GM); 4. Chloramphenicol (CH); 5. Ciprofloxacin (RC); 6. Tetracycline (TE); 7. Vancomycin (VA); 8. Nalidixic acid (NA).	77
<b>Fig. 2.A.15:</b> Bile salt tolerance activity of (A) <i>L. sphaericus</i> PKA17; (B) <i>B. cereus</i> PKA18; (C) <i>B. thuringiensis</i> PKA19 at 0.3% bile salt concentration in TSB media after overnight incubation.	79
<b>Fig. 2.A.16:</b> The bile salt hydrolase (bsh) activity of bacterial isolates grown on bile salt-TSA medium as manifested by the formation of precipitation zone around the colony.	80
<b>Fig. 2.A.17:</b> The test of mutual compatibility: (A) PKA18 and PKA19 isolates were cross-streaked against PKA17; (B) PKA17 and PKA19 isolates were cross-streaked against PKA18 on tryptone soya agar media.	81
<b>Fig. 2.B.1:</b> Multiple sequence alignment segment showing position of <i>Lysinibacillus sphaericus</i> bsh protein sequences with <i>B. anthracis</i> (Q81ST7) and <i>B. subterraneus</i> (A0A0D6Z9Q3).	88
<b>Fig. 2.B.2:</b> Neighbor-joined phylogenetic tree based on bsh protein sequences showing the relationships among <i>Lysinibacillus sphaericus</i> and <i>Bacillus</i> spp.	89

<b>Fig. 2.B.3:</b> Secondary structure comparison between predicted structure of <i>Lysinibacillus sphaericus</i> bsh protein (B1HPX8) and homologous structure of <i>Bacillus subtilis</i> (4wbdA)	91
<b>Fig. 2.B.4</b> : Structural alignment between predicted tertiary structure of <i>Lysinibacillus sphaericus</i> bsh protein (B1HPX8) and homologous structure of <i>Bacillus subtilis</i> (4wbdA).	92
<b>Fig. 2.B.5:</b> Ramachandran plot of predicted structure of <i>Lysinibacillus sphaericus</i> bsh protein (B1HPX8).	93
<b>Fig. 2.B.6:</b> Molecular docking between predicted <i>Lysinibacillus sphaericus</i> bsh protein (B1HPX8) and its substrate taurodeoxycholate.	95
<b>Fig. 2.B.7:</b> Amino acid involved in hydrogen bond formation with taurodeoxycholate at the catalytic site with specific H-bond length and binding energy.	96
<b>Fig. 2.B.8:</b> Molecular docking between predicted <i>Lysinibacillus sphaericus</i> bsh protein (B1HPX8) with substrate sodium taurocholate.	97
<b>Fig. 3.1:</b> Design of the cemented culture tank: (A) Rearing tank $(195 \times 105 \times 90 \text{ cm}^3)$ ; (B) Tank floor and walls, provided with cow dung; (C) Bottom mud of 5 cm; (D) Rearing fish.	103
<b>Fig. 3.2:</b> Weight of <i>C. batrachus</i> in relation to various feeds at different time interval.	113
<b>Fig. 3.3.1:</b> Effect of control feed on growth of <i>C. batrachus</i> fingerlings at different time interval.	114
<b>Fig. 3.3.2:</b> Effect of probiotic-supplemented feed (T1) on growth of <i>C. batrachus</i> fingerlings at different time interval.	115
<b>Fig. 3.3.3:</b> Effect of probiotic-supplemented feed (T2) on growth of <i>C. batrachus</i> fingerlings at different time interval.	116
<b>Fig. 3.3.4:</b> Effect of probiotic-supplemented feed (T3) on growth of <i>C. batrachus</i> fingerlings at different time interval.	117
<b>Fig. 3.4:</b> Regression line and scatter diagram of different growth parameters of <i>C. batrachus</i> with respect to (control, T1), (control, T2) and (control, T3) feed.	118
<b>Fig. 3.5:</b> Assessment of growth parameters of <i>C. batrachus</i> in T1 set in respect to control through mesh plot matrix.	119
<b>Fig. 3.6:</b> Assessment of growth parameters of <i>C. batrachus</i> in T2 set in respect to control through mesh plot matrix.	119
<b>Fig. 3.7:</b> Assessment of growth parameters of <i>C. batrachus</i> in T3 set in respect to control through mesh plot matrix.	120

<b>Fig. 3.8:</b> Weight of <i>C. batrachus</i> in relation to various feeds (supplemented with different concentration of <i>L. sphaericus</i> PKA17; control feed was not supplemented with probiotic) at different time interval.	129
<b>Fig. 3.9:</b> Weight of <i>C. batrachus</i> in relation to various feeds (supplemented with different concentration of <i>B. cereus</i> PKA18; control feed was not supplemented with probiotic) at different time interval.	130
Fig. 4.1: Geographical map of the study area (Bankura district with twenty-two blocks).	135
Fig. 4.2: Taxonomic order-wise occurrence of fishes in Bankura district.	136
<b>Fig. 4.3:</b> Spatial distribution of fish diversity of Bankura district (colours of the legend indicate the number of fish species found in the corresponding places).	141
Fig. 4.4: Spatial distribution map of Bankura district based on availability of <i>C. batrachus</i> .	148
<b>Fig. 4.5:</b> Substitution of <i>C. batrachus</i> with <i>C. gariepinus</i> in local fish markets: (A) Bankura-II; (B) Sarenga; (C) Ranibundh; (D) Bishnupur; (E) Raipur; (F) Bankura-I blocks.	149
