General Introduction:	01-06
Review of Literature:	07-21
Aquaculture probiotics:	07
Molecular identification techniques for probiotics:	11
Microbial infections in <i>Clarias</i> species:	13
Probiotics in <i>Clarias</i> species:	15
Improvement in nutrient digestion:	15
Improvement of culture water:	17
Production of inhibitory substances against pathogens:	17
Stimulation of immunity:	18
Competition for adhesion sites and nutrients:	18
Interference in quorum sensing:	20
Selection of probiotic:	20
Chapter 1: Study of the physico-chemical characters of water of a normal habitat of <i>Clarias batrachus</i> at monthly interval.	22-45
1.1 Introduction:	22
1.2 Materials and Methods:	23
1.2.1 Study area:	23
1.2.2 Physico-chemical assessment of culture pond water:	25
1.2.2.1 Water Temperature:	25
1.2.2.2 Hydrogen ion concentration (pH):	25
1.2.2.3 Total dissolved solid (TDS):	25
1.2.2.4 Dissolved oxygen (DO):	25
1.2.2.5 Free carbon di-oxide (CO ₂):	26
1.2.2.6 Total alkalinity:	26
1.2.2.7 Salinity:	26
1.2.2.8 Dissolved inorganic nitrogen:	27
1.2.2.8.1 Ammonium and nitrate:	27
1.2.2.8.2 Nitrite:	27
1.2.2.9 Calcium and magnesium:	28
1.2.2.9.1 Calcium:	28
1.2.2.9.2 Magnesium:	28
1.2.2.10 Total hardness (TH):	29
1.2.3 Collection and analysis of plankton:	29
1.2.4 Bacteriological analysis:	30
1.2.5 Assessment of limnological conditions:	30
1.3 Results and Discussion:	31
1.3.1 Physico-chemical parameters of the culture pond:	31

1.3.2 Plankton diversity:	39
1.3.2.1 Zooplankton:	39
1.3.2.2 Phytoplankton:	41
1.3.3 Bacterial flora:	43
1.4 Conclusion:	45
Chapter 2A: Isolation and selection of probiotic microorganisms from the intestine of adult <i>Clarias batrachus</i>.	46-82
2.A.1 Introduction:	46
2.A.2 Materials and Methods:	48
2.A.2.1 Collection of indigenous <i>C. batrachus</i> :	48
2.A.2.2 Isolation of intestinal microflora:	48
2.A.2.3 Cultivation of microbiota:	49
2.A.2.4 Colony characterization of the isolates:	49
2.A.2.5 Staining of the bacterial isolates:	49
2.A.2.5.1 Gram's staining:	49
2.A.2.5.2 Endospore staining:	50
2.A.2.6 Test of antagonism against pathogens:	50
2.A.2.7 Selection of potent isolates:	50
2.A.2.8 Cultivation of putative probionts:	51
2.A.2.9 Determination of growth phase:	51
2.A.2.10 Motility test:	51
2.A.2.11 Biochemical characterization of probiotic bacteria:	51
2.A.2.11.1 Sugar fermentation test:	51
2.A.2.11.2 Catalase test:	52
2.A.2.11.3 Indole production test:	52
2.A.2.11.4 Methyl red and Voges-Proskauer test:	53
2.A.2.11.5 Citrate test:	53
2.A.2.11.6 Urea hydrolysis:	53
2.A.2.11.7 Starch hydrolysis:	54
2.A.2.11.8 Protease test:	54
2.A.2.11.9 Cellulase test:	54
2.A.2.11.10 Xylanase test:	55
2.A.2.11.11 Phosphate solubility test:	55
2.A.2.11.12 Nitrate reduction test:	55
2.A.2.12 Molecular identification of bacterial strains:	56
2.A.2.12.1 Isolation of chromosomal DNA:	56
2.A.2.12.2 Amplification and sequencing of 16S rDNA: ...	57
2.A.2.12.3 Phylogram construction:	57
2.A.2.13 Scanning electron microscopic study:	57
2.A.2.14 Antibiotic susceptibility test:	58
2.A.2.15 Cell surface hydrophobicity test:	58
2.A.2.16 Bile salt tolerance test:	59

2.A.2.17 Bile salt hydrolase activity:	59
2.A.2.18 Haemolysis test:	59
2.A.2.19 Study of mutual compatibility:	60
2.A.3 Results and Discussion:	60
2.A.3.1 Isolation of bacteria from the intestine of <i>C. batrachus</i> :	60
2.A.3.2 Selection of probiotic bacteria:	64
2.A.3.3 Cultivation of putative probionts:	66
2.A.3.4 Determination of growth phase:	68
2.A.3.5 Motility:	69
2.A.3.6 Biochemical characterization of selected probiotic bacteria:	69
2.A.3.7 Molecular identification of bacterial isolates:	72
2.A.3.8 Scanning electron microscopic study:	75
2.A.3.9 Antibiotic sensitivity:	76
2.A.3.10 Cell surface hydrophobicity:	78
2.A.3.11 Bile salt tolerance:	78
2.A.3.12 Bile salt hydrolysis:	79
2.A.3.13 Haemolytic activity:	80
2.A.3.14 Mutual compatibility:	81
2.A.4 Conclusion:	82

Chapter 2B: *In silico* structure prediction and catalytic interaction study of probiotic marker protein: bile salt hydrolase from *Lysinibacillus sphaericus*. 83-99

2.B.1 Introduction:	83
2.B.2 Materials and Methods:	84
2.B.2.1 <i>In silico</i> characterization of bsh protein:	84
2.B.2.2 Multiple sequence alignment and phylogenetic tree construction:	85
2.B.2.3 Structure prediction:	85
2.B.2.4 Substrate and inhibitor structure retrieval:	85
2.B.2.5 Active site prediction:	85
2.B.3 Results and Discussion:	86
2.B.3.1 <i>In silico</i> characterization of bile salt hydrolase (bsh) protein of <i>L. sphaericus</i> :	86
2.B.3.2 Multiple sequence alignment and phylogenetic analysis:	86
2.B.3.3 Homology modeling of <i>L. sphaericus</i> bsh protein:	90
2.B.3.4 Active site prediction through molecular docking:	94
2.B.3.5 Enzyme-inhibitor interaction study through molecular docking:	97
2.B.4 Conclusion:	99

Chapter 3: Study of growth and nutrient status of <i>C. batrachus</i> through the application of newly isolated probiotic-supplemented feed	100-131
3.1 Introduction:	100
3.2 Materials and Methods:	102
3.2.1 Experimental set up:	102
3.2.2 Probiotic strains:	102
3.2.3 Formulation of experimental feed:	103
3.2.4 Morphometric measurement of the fingerlings:	104
3.2.5 Proximate analysis of fish carcass:	106
3.2.5.1 Determination of crude protein:	106
3.2.5.2 Determination of carbohydrate:	106
3.2.5.3 Determination of fat:	107
3.2.5.4 Determination of iron:	107
3.2.5.5 Determination of moisture:	107
3.2.5.6 Determination of ash:	108
3.2.5.7 Determination of amino acid:	108
3.2.5.8 Estimation of vitamins:	108
3.2.6 Hematological determination:	109
3.2.7 Statistical analysis of the results obtained:	109
3.2.8 Dose level determination:	110
3.3 Results and Discussion:	110
3.3.1 Morphometric measurement of the fingerlings:	110
3.3.2 Assessment of growth parameters:	117
3.3.3 Proximate analysis of the fish carcass:	120
3.3.4 Haematological parameters:	126
3.3.5 Dose determination of <i>Lysinibacillus sphaericus</i> PKA17: ..	128
3.3.6 Dose determination of <i>Bacillus cereus</i> PKA18:	129
3.4 Conclusion:	131
Chapter 4: Present scenario and existing threats of <i>Clarias batrachus</i> in Bankura district, WB with reference to freshwater fish diversity.	132-150
4.1 Introduction:	132
4.2 Materials and Methods:	134
4.2.1 Field survey:	134
4.2.2 Collection of fishes:	134
4.2.3 Identification of fishes:	135
4.2.4 Representation of spatial distribution of fishes:	135
4.3 Results and Discussion:	136
4.3.1 Ichthyofaunal diversity:	136
4.3.2 Small indigenous fishes:	141
4.3.3 The conservation status of obtained freshwater fishes:	143
4.3.4 Present scenario of <i>C. batrachus</i> cultivation:	145

4.3.4.1 Habitat	145
4.3.4.2 Induced breeding	145
4.3.4.3 Stocking density in culture pond	145
4.3.4.4 Production cost	146
4.3.4.5 Market demand	146
4.3.5 Major challenges	147
4.4 Conclusion:	150
Summary	151-155
Conclusion	156-157
References	158-191
List of publications	192
