

Table of Contents

Chapter-1: Introduction and review of literature	1
1.1 Introduction	2
1.1.1 Concept and significance of Nanotechnology	2
1.1.2. Nanomedicine	2-3
1.1.3. Metal nanoparticles.....	3
1.1.3.1 Gold Nanoparticles	4
1.1.3.1.1. Different methods for synthesis of gold nanoparticles:	5
1.1.4 Plant based natural products or Phyto-compounds.....	6
1.1.4.1. Indole-3-carbinol:	6
1.1.5. Cancer:	7
1.1.5.1 Types of Cancer:	8-9
1.1.6. Cancer therapy	9-10
1.1.7. Drug Delivery	10-11
1.1.8. Drug targeting to tumours.....	11-12
1.2. Review of literature:.....	12
1.2.1. Indole -3-carbinol as an anticancer agent:	13-14
1.2.2. Green synthesis of gold nanoparticles	14-15
1.2.3. Green synthesized gold nanoparticles as an anticancer agent:	15-16
1.2.4. Green synthesized gold nanoparticles as an antioxidant:	16-17
1.2.5. Green synthesized gold nanoparticles as an anti-inflammatory agent:.....	17
1.3. Aim and objectives:.....	18
Chapter-2: Synthesis of biogenic gold nanoparticles using indole-3-carbinol and its characterization	19
2.1 Introduction	21-23
2.2 Materials and methods	23-27
2.2.1 Chemicals and reagents	23
2.2.2 Solution preparation of indole-3-carbinol	23
2.2.3 Synthesis of gold nanoparticles (AuNPs) by chemical method	23
2.2.4 Synthesis of biogenic gold nanoparticles using indole-3-carbinol.....	24
2.2.5. Characterization of AuNPI3Cs.....	24
2.2.5.1 Dynamic light scattering (DLS) and surface zeta potential measurement	24
2.2.5.2 UV-Vis spectral analysis	24-25

2.2.5.3 X-ray diffraction (XRD) analysis	25
2.2.5.4 Fourier transforms infrared spectroscopy (FTIR).....	25
2.2.5.5 High resolution transmission electron microscopic (HR-TEM) study	25-26
2.2.5.6 Scanning electron microscopic (SEM) study	
2.2.5.7 Energy dispersive X-ray analysis (EDX).....	26
2.2.5.8 Atomic force microscopy (AFM) study.....	26
2.2.5.9 NMR study.....	26-27
2.3. Results	30
2.3.1 Dynamic light scattering and zeta potential measurement	27
2.3.2 UV-Vis spectral analysis	27
2.3.3 X-ray diffraction analysis	27
2.3.4 FTIR analysis.....	28
2.3.5 Transmission electron microscopy and scanning electron microscopy analysis	28
2.3.6 AFM study.....	28
2.3.7 NMR analysis.....	28-29
2.4 Discussion	31-34
2.5 Conclusion.....	34
Chapter-3: Toxicity study of biogenic gold nanoparticles (AuNPI3Cs)	35
3.1 Introduction	37-38
3.1.1 Types of toxicity assessment	37
3.1.2 Modes of toxicity assessment.....	37-38
3.1.3 Nanotoxicology:	38
3.2 Materials and methods	39
3.2.1 Chemicals	39
3.2.2 <i>In-vitro</i> acute toxicity study.....	39
3.2.2.1 In-vitro toxicity study of zebrafish embryos.....	39
3.2.2.2 Collection of zebra fish embryo.....	39
3.2.2.3 Procedure of toxicity study on zebrafish embryo	40
3.2.2.4 Brine shrimp lethality test.....	40
3.2.2.5 Collection and hatching of brine shrimp.....	40
3.2.2.6 Procedure of brine shrimp lethality test.....	40-41
3.2.2.7 Toxicity study on human lymphocytes	41
3.2.2.7.1 Collection, separation and culture of human lymphocytes	41

3.2.2.7.2 Oxidative stress study	41
3.2.2.7.2.1 MDA Estimation.....	41
3.2.2.7.2.2 Estimation of reduced glutathione (GSH)	42
3.2.2.7.2.3 Intracellular ROS measurement.....	42
3.2.2.7.2.4 DNA fragmentation study	42
3.2.2.7.2.5 Analysis of cell cycle by flow cytometry	43
3.2.3 Sub-acute toxicity study in mice model	43
3.2.3.1 Animal maintenance	43
3.2.3.2 Treatment schedule	43
3.2.3.3 Body and organ weight measurement.....	44
3.2.3.4 Blood sample collection.....	44
3.2.3.5 Red blood cell (RBC) count.....	44
3.2.3.6 White blood cell (WBC) count	45
3.2.3.7 Determination of haemoglobin percentage.....	45
3.2.3.8 Estimation of urea	45
3.2.3.9 Estimation of creatinine	45
3.2.3.10 Measurement of serum alkaline phosphatase (ALP)	46
3.2.3.11 Measurement of serum glutamate oxaloacetate transaminase (SGOT) and serumgluamate pyruvate transaminase (SGPT).....	46
3.2.3.12 Blood glucose estimation.....	46
3.2.3.13 Estimation of serum cholesterol.....	47
3.2.3.14 Histopathological study	47
3.2.3.15 Statistical analysis.....	47
3.3 Results	48
3.3.1 Acute toxicity study of AuNPI3Cs.....	48
3.3.1.1 Effect of AuNPI3Cs on toxicity study of zebrafish embryos	48
3.3.1.2 Effect of AuNPI3Cs on Brine shrimp lethality bioassay	49
3.3.1.3 Effect of AuNPI3Cs on brine shrimp morphology	50
3.3.1.4 Effect of AuNPI3Cs on comet assay of brine shrimp.....	50
3.3.2 Toxicity study of AuNPI3Cs on human lymphocytes.....	51
3.3.2.1 Effect of AuNPI3Cs on MDA level of human lymphocytes	51
3.3.2.2 Effect of AuNPI3Cs on GSH level of human lymphocytes	51
3.3.2.3 Effect of AuNPI3Cs on ROS generation of human lymphocytes.....	52
3.3.2.4 DNA fragmentation study of human lymphocytes	52

3.3.2.5 Cell cycle analysis of lymphocyte by flow cytometry	53
3.3.4. Sub acute toxicity study in <i>in vivo</i>	53
3.3.4.1 Effect of AuNPI3Cs on changes in body weight and organ weight	53
3.3.4.2 Effect of AuNPI3Cs on haematological parameters	54
3.3.4.3. Effect of AuNPI3Cs on hepatic and renal biochemical parameters	55
3.3.4.3.1 Changes in serum urea level.....	55
3.3.4.3.2 Changes in serum creatinine level.....	56
3.3.4.3.3 Changes in serum ALP level	56
3.3.4.3.4 Changes in SGOT level.....	57
3.3.4.3.5 Changes in SGPT level	57
3.3.4.3.6 Changes in blood glucose level.....	58
3.3.4.3.7 Changes in serum cholesterol level.....	58
3.3.4.4 Effects of AuNPI3Cs on histopathology.....	59
3.3 Discussion	59-62
3.4 Conclusion.....	62
Chapter-4: Biogenic AuNPI3Cs exhibit antineoplastic potential against human leukemia and breast cancer cell lines through the induction of apoptosis and oxidative stress.....	63
4.1 Introduction	65
4.1.1 Apoptosis	65
4.1.2 Mechanism of apoptosis	66
4.1.3 4.1.3 Oxidative stress and apoptosis.....	68
4.1.4 Leukaemia	69
4.1.5 Breast Cancer	69
4.1.6 Herbal therapy in leukemia and breast cancer.....	70
4.1.7 Gold nanoparticles on leukaemia and breast cancer.....	71
4.2 Materials and methods	72
4.2.1 Chemicals	72
4.2.2 Cancer cell lines and culture.....	73
4.2.3 Isolation and separation of human lymphocytes	73
4.2.4 Experimental design	73
4.2.5 <i>In vitro</i> cytotoxicity study by MTT assay	74
4.2.6 Intracellular ROS measurement.....	74
4.2.7 Estimation of reduced glutathione (GSH)	74

4.2.8 Determination of oxidized glutathione (GSSG)	74
4.2.9 Cell morphology analysis by polarizing microscopy	75
4.2.10 Chromatin condensation study by propidium iodide (PI) and 4', 6'-diamidino-2-phenylindole dihydrochloride (DAPI) staining	75
4.2.11 Measurement of mitochondrial membrane potential ($\Delta\Psi_m$)	75
4.2.12 DNA fragmentation study by agarose gel electrophoresis	76
4.2.13 Cell cycle analysis by flow cytometry.....	76
4.2.14 Cytoskeleton study by confocal microscopy.....	77
4.2.15 Western blot analysis.....	77
4.3 Results	78
4.3.1 <i>In vitro</i> cytotoxicity by AuNPI3Cs.....	78
4.3.2 Oxidative stress in Jurkat and MCF-7 cells.....	78-80
4.3.3 Cellular morphological analysis by phase contrast	81
4.3.4 Chromatin condensation study by AuNPI3Cs.....	82-83
4.3.5 Effect on mitochondrial membrane potential	83-84
4.3.6 Effect of AuNPI3Cs on DNA fragmentation	85
4.3.7 Cell cycle arrest by AuNPI3Cs.....	85-86
4.3.8 Cytoskeleton study by AuNPI3Cs on MCF-7 cells.....	86
4.3.9 Effect on expression of apoptotic proteins.....	87
4.4 Discussion	88-90
4.5 Conclusion.....	90-91
Chapter- 5: The molecular mechanism of <i>in vitro</i> and <i>in vivo</i> anticancer potential of biogenic AuNPI3Cs against Ehrlich ascites carcinoma (EAC) cells.....	92
5.1. Introduction	94
5.2 Materials and methods	95
5.2.1 Chemicals and culture media.....	97
5.2.2 Animal maintenance	97
5.2.3 Cancer cell culture	97
5.2.4 Isolation of mouse lymphocytes	98
5.2.5 Experimental Design	98
5.2.6 <i>In vitro</i> cytotoxicity study by MTT assay	98
5.2.7 <i>In vitro</i> drug uptake assay.....	98
5.2.8 Estimation of reduced glutathione (GSH)	99

5.2.9 Determination of oxidized glutathione (GSSG)	99
5.2.10 Intracellular ROS measurement.....	99
5.2.11 Cellular morphology study by polarizing microscopy and scanning electron microscopy.....	99
5.2.12 Lactate dehydrogenase release assay.....	100
5.2.13 Chromatin condensation by PI and DAPI staining.....	100
5.2.14 Acridine orange–ethidium bromide double staining	100
5.2.15 Terminal deoxynucleotidyl transferase-mediated dUTP nick end labeling (TUNEL) assay.....	101
5.2.16 Genotoxicity study by alkaline comet assay.....	101
5.2.17 Measurement of Mitochondrial membrane potential ($\Delta\Psi_m$)	101
5.2.18 Detection of apoptosis by Annexin V-FITC apoptosis detection kit.....	101
5.2.19 Analysis of cell cycle disruption by flow cytometry	102
5.2.20 Western blot analysis.....	102
5.2.21 <i>In vivo</i> study.....	102-107
5.3 Results	108
5.3.1 Effect of AuNPs and AuNPI3Cs on <i>in vitro</i> cytotoxicity against EAC cells.....	108
5.3.2 Intracellular uptake of AuNPI3Cs in EAC cells.....	108
5.3.3 Effect of AuNPI3Cs on GSH and GSSG content of EAC cells	109
5.3.4 Effect of AuNPI3Cs on ROS generation in EAC cells	110
5.3.5 Effect of AuNPI3Cs on cellular morphology in EAC cells.....	111
5.3.6 Effect of AuNPI3Cs on LDH release in EAC cells.....	112
5.3.7 Effect of AuNPI3Cs on chromatin condensation in EAC cells.....	113
5.3.8 AO-EtBr staining in EAC cells	113
5.3.9 DNA fragmentation study TUNEL assay and alkaline comet assay.....	114-115
5.3.10 Effect of AuNPI3Cs in Mitochondrial membrane potential ($\Delta\Psi_m$)	116
5.3.11 Cell Death Analysis-Annexin V-FITC/PI Staining	128-129
5.3.12 Flow cytometry–based analysis of cellular apoptosis	118
5.3.13 Western Blotting.....	120
5.3.14 Effect of AuNPI3Cs on tumour growth of EAC-bearing mice	120
5.3.15 Effect of AuNPI3Cs on hematological parameters.....	123
5.3.16 Effect of AuNPI3Cs on antioxidant parameters.....	124
5.3.17 Tumour growth in EAC–induced solid tumor	127

5.4. Discussion	131-137
5.5. Conclusion.....	137
Chapter-6: Biogenic AuNPI3Cs produces oxidative stress and antiproliferation against Dalton's Ascitic Lymphoma (DLA) cells.....	138
6.1 Introduction:	140
6.1.1 Lymphoma and its treatments.....	140
6.1.2 Dalton ascites lymphoma (DLA) cell	141
6.1.3 Dalton's ascites lymphoma model to study the antiproliferative role of medicinal plants.....	141
6.2 Materials and methods	143
6.2.1 Chemicals and reagents	143
6.2.2 Animal maintenance	143
6.2.3 Cancer cell culture	143
6.2.4 Isolation of mouse lymphocytes	144
6.2.5 Experimental Design.....	144
6.2.6 In vitro cytotoxicity study by MTT assay	144
6.2.7 Estimation of reduced glutathione (GSH)	144
6.2.8 Determination of oxidized glutathione (GSSG)	144
6.2.9 Intracellular ROS measurement.....	144
6.2.10 Chromatin condensation by PI and DAPI staining.....	145
6.2.11 Acridine orange–ethidium bromide double staining.....	146
6.2.12 DNA fragmentation study by agarose gel electrophoresis	146
6.2.13 Measurement of Mitochondrial membrane potential ($\Delta\Psi_m$)	146
6.2.14 Analysis of cell cycle disruption by flow cytometry.....	146
6.2.15 In vivo study	146
6.2.16 Changes in Body weight	146
6.2.17 Studies on host survival time and increase life span.....	146
6.2.18 Tumour volume.....	146
6.2.19 Tumour cell count.....	146
6.2.20 Haematological analysis	147
6.2.21 Antioxidant Parameters	147
6.2.22 Statistical analysis.....	147

6.3. Results.....	148
6.3.1 Effect of AuNPs and AuNPI3Cs on in vitro cytotoxicity against DLA cells.....	148
6.3.2 Effect of AuNPI3Cs on GSH and GSSG content of DLA cells	149
6.3.3 Effect of AuNPI3Cs on ROS generation in DLA cells	149
6.3.4 Effect of AuNPI3Cs on chromatin condensation in DLA cells.....	150
6.3.5 AO-EtBr staining in DLA cells.....	151
6.3.6 DNA fragmentation study by gel eletrophoresis	152
6.3.7 Effect of AuNPI3Cs in Mitochondrial membrane potential ($\Delta\Psi_m$)	152
6.3.8 Flow cytometry–based analysis of cellular apoptosis.....	153
6.3.9 Effect of AuNPI3Cs on tumor growth of DLA-bearing mice	154
6.3.10 Effect of AuNPI3Cs on hematological parameters.....	157
6.3.11 Effect of AuNPI3Cs on antioxidant parameters	159
6.4. Discussion	161-164
6.5 Conclusion.....	163-164
Chapter-7: Antioxidant and anti-inflammatory potential of biogenic AuNPI3Cs.....	165
7.1 Introduction:	167
7.2. Materials and methods	170
7.2.1. Chemicals and reagents	170
7.2.2. <i>In-vitro</i> antioxidant activity	170
7.2.2.1 DPPH scavenging assay.....	170
7.2.2.2 Nitric oxide scavenging activity	171
7.2.2.3 Superoxide anion scavenging assay.....	171
7.2.2.4 Hydroxyl radical scavengingactivity	171
7.2.2.5 Peroxynitrite scavengingassay	172
7.2.2.6 Hypochlorous acid scavengingactivity	172
7.2.2.7 Lipid peroxidation scavengingassay	172
7.2.3 <i>In-vitro</i> anti-inflammatory activity	173
7.2.3.1 The human red blood cell (HRBC) membrane stabilization method	173
7.2.3.2. Inhibition of protein denaturation	174
7.2.4 <i>In-vivo</i> anti-inflammatory activity.....	174
7.2.4.1 Assay of carrageenan-induced edema in rats.....	174
7.2.5 Statistical analysis.....	175
7.3 Results:	175

7.4. Discussion:	182-184
7.5. Conclusion:.....	185
Conclusion:	186
Summary:	187-188
Bibliography:	189-221
