I Introduction and Solution Methodologies 1

1 Introduction 3
- 1.1 Operations Research . . . 3
  - 1.1.1 Inventory Control System in Operations Research . . . 4
  - 1.1.2 Supply Chain Management in Operations Research . . . 6
- 1.2 Basic Concepts and Terminologies in Supply Chain/Inventory models 7
  - 1.2.1 Definitions and Terminologies . . . 7
  - 1.2.2 Costs and Revenue . . . 12
- 1.3 Different Environments . . . 13
- 1.4 Historical Review on Inventory/SC Models . . . 14
  - 1.4.1 Historical review on models in crisp environment . . . 14
  - 1.4.2 Historical review on models in imprecise environment . . . 15
  - 1.4.3 Historical review on demand pattern . . . 16
  - 1.4.4 Historical review on trade credit policy . . . 17
  - 1.4.5 Historical review on price discount policy . . . 18
  - 1.4.6 Historical review on deteriorating item . . . 18
  - 1.4.7 Historical review on displayed inventory . . . 19
  - 1.4.8 Historical review on inflation and time value of money . . . 19
  - 1.4.9 Historical review on promotional effort strategy . . . 20
- 1.5 Motivation and Objectives of the Thesis . . . 20
- 1.6 Organization of the Thesis . . . 23

2 Solution Methodologies 31
- 2.1 Mathematical Prerequisites . . . 31
  - 2.1.1 Crisp Set Theory . . . 31
  - 2.1.2 Fuzzy Set Theory . . . 32
    - 2.1.2.1 Fuzzy Set . . . 32
    - 2.1.2.2 Fuzzy Number . . . 33
    - 2.1.2.3 α-cut of a Fuzzy Number . . . 35
    - 2.1.2.4 Defuzzification Methods . . . 36

2.1.2.5 Different Measures in Fuzzy Environment 36
2.1.2.6 Fuzzy Differential Equation (FDE) 40
2.1.2.7 Fuzzy Riemann Integration (FRI) 43
2.1.3 Rough Set Theory 44
2.1.4 Interval and some useful properties 48
2.1.5 Ranking of intervals 49
2.2 Solution Methods/Techniques in Crisp Environment 52
2.2.1 Classical Optimization Technique 54
2.2.1.1 Generalized Reduced Gradient (GRG) Technique . 54
2.2.2 Soft Computing Techniques 57
2.2.2.1 Particle Swarm Optimization (PSO) Technique . . . 58
2.2.2.2 Tuning of PSO parameter using Taguchi method . . 61
2.2.2.3 Multi-choice Artificial Bee Colony (MCABC) Algorithm 64
2.2.2.4 Mixed-mode Multi-choice Artificial Bee Colony (MMCABC) Algorithm 69
2.3 Solution Methods/Techniques in Fuzzy Environment 73
2.3.1 Type-I: Imprecise (fuzzy) Parameters in Objective Function 74
2.3.2 Type-II: Imprecise (fuzzy) Parameters in both the Objective Function and Constraint 75
2.4 Solution Methods/Techniques in Rough Environment 76
2.4.1 Type-I: Imprecise (rough) Parameters in Objective Function 76
2.4.2 Type-II: Imprecise (rough) Parameters in both the Objective Function and Constraint 77

II Some Supply Chain Management Models 79

3 Single-item Supply Chain Management models 81
3.1 Introduction 81
3.2 Model 3.1: Two-Level Supply Chain for a Deteriorating Item with Stock and Promotional Cost Dependent Demand Under Shortages . 88
3.2.1 Assumptions and Notations 88
3.2.2 Mathematical Formulation of the Model 89
3.2.2.1 Retailer's Inventory Level (OW and RW) 89
3.2.2.2 Wholesaler's Inventory Level 92
3.2.2.3 Retailer's Profit 93
3.2.2.4 Wholesaler's Profit 95
3.2.2.5 Non-Coordination Scenario (NCS) 97
3.2.2.6 Coordination Scenario (CS) 98
3.2.2.7 Fuzzy Model 99
3.2.2.8 Rough Model 103
3.2.3 Numerical Illustration and Discussion 107
3.2.3.1 ANOVA Test 113
3.3 Model 3.2: Two-Level Supply Chain of a Seasonal Deteriorating Item with Time, Price and Promotional Cost Dependent Demand In Finite Time Horizon 115

3.3.1 Assumptions and Notations . . . 115
3.3.2 Mathematical Formulation of the Model . . . 117
3.3.2.1 Retailer's Inventory Level . . . 117
3.3.2.2 Wholesaler's Inventory Level . . . 119
3.3.2.3 Retailer's Profit . . . 122
3.3.2.4 Wholesaler's Profit . . . 125
3.3.2.5 Fuzzy Supply Chain Model . . . 128
3.3.3 Numerical Illustration . . . 131
3.3.4 Discussion . . . 134
3.3.5 Managerial Implementation . . . 135
3.4 Model 3.3: A Supply Chain with Fuzzy Production Rate and Demand Under Inflation and Promotional Cost Sharing Using ABC . . . 136
3.4.1 Assumptions and Notations . . . 136
3.4.2 Mathematical Formulation of the Model . . . 139
3.4.2.1 Manufacturer's Profit . . . 139
3.4.2.2 Supplier's Profit . . . 147
3.4.3 Numerical Illustration and Discussion . . . 152
3.5 Conclusion . . . 157

4 Multi-item Supply Chain Management models 161
4.1 Introduction . . . 161
4.2 Model 4.1: Uncertain Multi-item Supply Chain with Two Level Trade Credit Under Promotional Cost Sharing . . . 167
4.2.1 Assumptions and Notations . . . 167
4.2.2 Mathematical Formulation of the Model . . . 169
4.2.2.1 Retailer's Profit . . . 169
4.2.2.2 Supplier's Profit . . . 171
4.2.2.3 Channel Profit . . . 171
4.2.2.4 Non-Coordination Scenario . . . 171
4.2.2.5 Coordination Scenario . . . 174
4.2.2.6 Models in Different Environments and under Different Constraints . . . 177
4.2.3 Numerical Illustration . . . 182
4.2.4 Discussion . . . 187
4.2.5 Managerial Implementation . . . 188
4.3 Model 4.2: Fuzzy Optimization for Multi-item Supply Chain with Trade Credit and Two-Level Price Discount Under Promotional Cost Sharing . . . 190
4.3.1 Assumptions and Notations . . . 190
4.3.2 Mathematical Formulation of the Model . . . 192
4.3.2.1 Retailer's Profit . . . 192
4.3.2.2 Supplier's Profit . . . 193
4.3.2.3 Channel Profit . . . 194
4.3.2.4 Non-Coordination Scenario (NCS) . . . 194
4.3.2.5 Coordination Scenario (CS) . . . 197
4.3.2.6 Fuzzy Model . . . 200
4.3.3 Numerical Illustration . . . 203

4.3.3.1 ANOVA Test . . . 205
4.3.4 Discussion . . . 206
4.4 Model 4.3: A Two-warehouse Multi-item Supply Chain with Stock Dependent Promotional Demand Under Joint Replenishment Policy: A Mixed-mode ABC Approach . . . 207
4.4.1 Assumptions and Notations . . . 207
4.4.2 Mathematical Formulation of the Model . . . 210
4.4.2.1 Retailer's Profit . . . 210
4.4.2.2 Wholesaler's Profit . . . 217
4.4.2.3 Promotional Cost . . . 219
4.4.2.4 Crisp Model . . . 219
4.4.2.5 Fuzzy Model . . . 221
4.4.2.6 Rough Model . . . 223
4.4.3 Numerical Illustration and Discussion . . . 225
4.5 Model 4.4: A Multi-item Supply Chain with Multi-level Trade Credit Policy Under Inflation: A Mixed-mode ABC Approach . . . 230
4.5.1 Assumptions and Notations . . . 230
4.5.2 Mathematical Formulation of the Model . . . 233
4.5.2.1 Retailer's Profit . . . 233
4.5.2.2 Wholesaler's Profit for the i-th item . . . 244
4.5.2.3 Promotional Cost . . . 254
4.5.2.4 Crisp Model . . . 254
4.5.2.5 Fuzzy Model . . . 256
4.5.2.6 Rough Model . . . 258
4.5.3 Numerical Illustration and Discussion . . . 260
4.6 Conclusion . . . 265

III Summary of the Thesis and Future Research Directions 269

5 Summary of the Thesis and Future Research Directions 271
5.1 Summary . . . 271
5.2 Future research directions . . . 273

IV Bibliography and Index 275
