# List of Tables

2.1.1 - Percentage of household get job with issued job card

2.1.2.a: State-wise Average Persondays of Employment Per Household

2.1.2.b - Percentage of household receiving at least 100 days of employment among total household provided employment

2.1.3.a: Percentage of SCs & STs Participation in Total MGNREGA Job

2.1.3.b - Percentage of Women Participation in Total MGNREGS Job

2.2.1.a: Percapita Expenditure under MGNREGA

2.2.1.b: Percentage expenditure against total fund available

2.2.1: Percapita expenditure and percentage expenditure against total fund available in an average (2006-07 to2015-16)

2.3.1: Total work taken up across states

2.3.2: Percentage of work completed over total work taken across states

2.3.2: Total work taken up and percentage of work completed (2006-07 to 2015-16)

2.4.1: Analysis of performance of different attribute over time for India

2.4.2: Indicators taken to calculate TFA

3.1.1: Over View of MGNREGS in West Bengal up to 1st October 2016

3.2.1 - Percentage share of job card among SC/ST in Total Job card Distributed

3.2.2 - Percentage of household get job with issued job card

3.2.1.: MPCE across ST and Non ST of backward region and West Bengal

3.2.3.a: District-wise Average Persondays of Employment Per Household

3.2.3.b: Percentage of household receiving at least 100 days of employment among total household provided employment

3.2.4.a: Percentage of SCs & STs participation in total MGNREGA job

3.2.4.b: Ratio of SC & ST participation in total MGNREGS job over total SC & ST population

3.3.4.c: Percentage of women participation in total MGNREGA job

3.3.1: Percapita expenditure through MGNREGA

3.3.2: Percentage Expenditure on Wage

3.4.1: Total works taken up

3.4.2: Percentage of work completed over total work taken

3.5.1: Analysis of performance of different attribute over time for West Bengal

3.5.2: Indicators taken to calculate TFA

4.1.1: Percentage Distribution of Persons by Usual Status (Principal and Subsidiary) in Worker Population Ratio (WPR) in West Bengal in Rural Area

4.1.2: Changing Scenario in Rural Sector Broad employment status for rural West Bengal: 2005-06 to 2011-12 (in Percent)

4.1.3: Percentage distribution of person of age 15 years and above in the rural area by status of getting work in public works during last 365 days in West Bengal

4.3.1: Average wage earnings (Rs. 0.00) per day received by casual labour of age 15-59 years engaged in MGNREGA public works, public works other than MGNREGA and casual labour in private in West Bengal

4.3.1: Correlation Matrix of the selective variables of this model

4.3.2: Regression Result of Real Wage Rate of Male Field Labour

4.3.3: Regression Result of Real Wage Rate of Female Field Labour

5.1.1: Distribution of population by sex

5.1.2: Percentage distribution of population by age group across Villages

5.1.3: Percentage Distribution of Households by Income Group

5.2.1: Distribution of Household as per the Main Source of Income

5.2.2: Percentage Distribution of Households by Landholding

5.3.1: Project cost of MGNREGA and persondays generated in the studied villages

5.3.2: Percentage of Household Participating under MGNREGA

5.3.3: Average Person-days of Employment Generated for Male-Female

5.3.4: Average Person-days of Employment Generated for Participating Households in MGNREGA

5.4.1: An account of assets created under MGNREGA in 2016-17 in studied Villages

5.5.1: Average wage earnings of participating households from MGNREGA work in 2016-17

5.5.2: Percentage share of MGNREGA income in total income of the participating households in 2016-17

5.5.3: Effect of MGNREGA Work on Total Income of Participating Household across Different Income Group in the Studied Villages

5.6.1: Percentage Distribution of Consumption of Commodities and Services by Different Categories of Households, 2016–17

5.6.2: Fractiles of the Village Distributions of MPCE and Participation in MGNREGA within the Class

5.6.3: Caste Wise Distribution of household on the Basis of Poverty across Villages

5.6.4: Notation, Mean, and SD of the Variables used in Probit Regression Model to estimate the effect MGNREGA Considering the both the Household participating and without participating Households

5.6.5: Probit Estimation of MGNREGA over sample Households on Poverty Considering both the Household Participating and without Participating Households in MGNREGA

6.1.1: Open Village Economy Output and Employment Multipliers

6.1.2: Closed Village Economy Output and Employment Multipliers

6.2.1: Increased Output in Sectors Achieved through Increased Expenditure of labour Households under MGNREGA Works (in Rs.)

6.2.2: Percentage Growth in Household Income of MGNREGA Activity through Multiplier Effect

6.3.1: Percentage of work completed over total work taken up

6.3.2: An account of assets creation under MGNREGA in 2016-17 in studied Villages
