

LIST OF TABLES

Table No.	Name	Page No.
Table I	Mushroom Diversity in West Bengal	13
Table II	List of antibacterial activity of mushroom species against pathogenic bacteria	28
Table III	Source, Type and Bioactivity of Some Mushroom Polysaccharides	33
Table 1.1	Distribution of mushroom species in Gurguripal Ecoforest (E= Edible, NE= Non edible, P= Poisonous)	49
Table 1.2	Seasonal occurrence of mushroom in Gurguripal Ecoforest	76
Table 1.3	Ethnomedicinal uses of some wild mushrooms in Gurguripal	81
Table 2.1	Nutrient contents of prime edible mushrooms in Gurguripal	97
Table 2.2	Extraction yield of phenolic compounds from <i>T. heimii</i> and <i>V. volvacea</i> ($\mu\text{g/gm}$)	100
Table 2.3(A)	Analysis of fatty acids in <i>T. heimii</i> through GC-MS	104
Table 2.3 (B)	Analysis of fatty acids in <i>V. volvacea</i> through GC-MS	105
Table 3.1	Comparative analysis of antibacterial activity of different mushroom extracts against pathogenic bacteria	117
Table 3.2	Antibacterial activity of AgNPs synthesized by <i>T. heimii</i> extract (inhibition zone in mm)	120
Table 3.3	MIC and MBC values of THP-I from <i>T. heimii</i> ($\mu\text{g/ml}$)	124
Table 4.1	List of selected trans-membrane protein sequences of <i>S. aureus</i>	141
Table 4.2	List of selected trans-membrane protein sequences of <i>E. coli</i>	146
Table 4.3	Selected proteins on the basis of ACE value in molecular docking using Patchdock (T=Transport, R=Response, S=Synthesis)	160
Table 4.4	Some common or phylogenetically related membrane protein for <i>S. aureus</i> and <i>E. coli</i> . The bold and star (*) sequences showed similarity with 99 trans-membrane proteins of <i>S. aureus</i> , with which <i>p</i> -CA was docked rigidly	168

LIST OF APPENDICES

Appendix No.	Name	Page No.
Appendix I	Demographic profile of informants living in Gurguripal	84
Appendix II	Pathogenicity of the target pathogens for the study of antibacterial activity of selected mushroom extracts	132
