List of Tables

1.1 Ranking of West Bengal districts on the basis of backwardness index

1.2 Sampling Framework of the Study area

2.1.1 Population, Growth of Population and relative share of STs in West Bengal with respect to India

2.1.2 STs and Non STs Literacy Rate in the Selected Districts of West Bengal, 2001-2011

2.1.3 ST Workers and Worker Population Ratio in West Bengal, 1971-2011

2.1.4 Occupation wise Classification of ST in West Bengal, 2011

2.1.5 Distribution of Percapita Cultivable Land of ST and Non ST (Puruliya, Bankura and Paschim Midnapur)

2.2.1 MPCE across ST and Non ST of backward region of West Bengal

2.2.2 Test of Significant difference between ST and non-ST at 2011-12 and 1993-94

2.3.1 Percentage of MPCE of Food and Non food Items across ST and Non-ST of the Backward Region

2.3.2 Test of Significance of ST and Non ST for Food and Non-food Items in 1993-94 and 2011-12

2.3.3 Test of Significance of ST for Food and Non-food Items in 1993-94 and 2011-12

2.3.4 Test of the relative share of Non food consumption of STs and Non in 1993-94 and 2011-12

2.3.5 Percentage of MPCE of Food Items across ST and Non-ST of the backward region

2.3.6 Quantity of Cereals Consumption (in Kilogram) by Tribes and Non tribes over the year 1993-94 to 2011-12

2.3.7 Percentage of MPCE of Non-Food Items across ST and Non-ST of the Backward Region

2.4.1 Sector Specific Poverty Line and Food Insecurity Line of Rural West Bengal (Rs. Percapita per month)

2.5.1 Contribution of PDS in Consumption (%) of the Backward Region across Tribes and Non tribes

2.5.2 Test of Significance of PDS Difference between ST and non-ST in 2011-12 and 1993-94

3.1.1 Trends of Food and Non Food Consumption across Marketed and Non Marketed sources of the study area

3.1.2 Trends of Food Consumption Item wise across Marketed and Non marketed Consumption Sources of the Backward Region

3.1.3 Trends of Non Food Consumption Item wise across Marketed and Non marketed Consumption

3.2.1 Test of significance between Food and Non Food at Current and Constant prices in 1993-94 and 2004-05

3.2.2 Test of significance between Food and Non Food at Current and Constant prices in 2004-05 and 2011-12

3.3.1 Notation, Specification, Mean, and SD of the Variables used in Pooled Regression Model to estimate the dependency on Marketed Consumption of the tribal Sample Households

3.3.2 Pooled Regression Estimation to estimate the dependency on Marketed Consumption of the tribal Sample Households

4.1.1 Distribution Tribal Population of West Bengal of 2001 and 2011

4.1.2 Distribution of Sample households across Tribes across Districts

4.1.3 Distribution of Households as per Monthly Income across Tribes across Districts (in percentage)

4.1.4 Distribution of sample households with Respect to Occupation Structure across Tribes across Districts

4.1.5 Distribution of Households in Percentage as per Land Holdings across Tribes across Districts

4.2.1 Monthly Percapita Consumption Expenditure (MPCE) across Tribes across districts

4.2.2 Test of significance of Difference in MPCE between the Tribes in Puruliya District

4.2.3 Test of significance of Difference in MPCE between the Tribes in Bankura District

4.2.4 Test of significance of Difference in MPCE between the Tribes in Midnapur District

4.2.5 Test of significance in Difference of Santal's MPCE between Districts

4.2.6 Test of significance in Difference of Munda's MPCE between Districts

4.2.7 Test of significance in Difference of Bhumij's MPCE between Districts

4.2.8 Test of Significance in Difference of Lodha's MPCE between Districts

4.2.9 Percentage of Food and Non food consumption across tribes across Districts

4.2.10 Percentage of Food Consumption Items Wise across Tribes across Districts

4.2.11 Percentage of Non Food Consumption Item Wise across Tribes across Districts

4.2.12 Percentage Share of Marketed and Non-Marketed Sources across Tribes across Districts

4.3.1 Sector Specific Food Security Line of Rural West Bengal in 2015-16 (Rs. Percapita per month)

4.4.1 Notation, Mean and SD of the Variables used in Linear Regression Model to Estimate the Dependency of Independent Variables of Puruliya Santals over MPCE of Sample Households

4.4.2 Linear Estimation of Dependency over MPCE and other Independent Variables of Puruliya Santals across Sample Households

4.4.3 Notation, Mean, and SD of the Variables used in Linear Regression Model to Estimate the Dependency of Independent Variables of Puruliya Mundas over MPCE of Sample Households

4.4.4 Linear Estimation of Dependency over MPCE and other Independent Variables of Puruliya Mundas across Sample Households

4.4.5 Notation, Mean, and SD of the Variables used in Linear Regression Model to Estimate the Dependency of Independent Variables of Puruliya Bhumijs over MPCE of Sample Households

4.4.6 Linear Estimation of Dependency over MPCE and other Independent Variables of Puruliya Bhumijs across Sample Households

4.4.7 Notation, Mean, and SD of the Variables Used in Linear Regression Model to Estimate the Dependency of Independent Variables of Puruliya Lodhas over MPCE of Sample Households

4.4.8 Linear Estimation of Dependency over MPCE and other Independent Variables of Puruliya Lodhas across Sample Households

4.4.9 Notation, Mean, and SD of the Variables Used in Linear Regression Model to Estimate the Dependency of Independent Variables of Bankura Santals over MPCE of Sample Households

4.4.10 Linear Estimation of Dependency over MPCE and other Independent Variables of Bankura Santals across Sample Households

4.4.11 Notation, Mean and SD of the Variables Used in Linear Regression Model to Estimate the Dependency of Independent Variables of Bankura Mundas over MPCE of Sample Households

4.4.12 Linear Estimation of Dependency over MPCE and other Independent Variables of Bankura Mundas across Sample Households

4.4.13 Notation, Mean and SD of the Variables used in Linear Regression Model to Estimate the Dependency of Independent Variables of Bankura Bhumijs over MPCE of Sample Households

4.4.14 Linear Estimation of Dependency over MPCE and other Independent Variables of Bankura Bhumijs across Sample Households

4.4.15 Notation, Mean and SD of the Variables used in Linear Regression Model to Estimate the Dependency of Independent Variables of Bankura Lodhas over MPCE of Sample Households

4.4.16 Linear Estimation of Dependency over MPCE and other Independent Variables of Bankura Lodhas across Sample Households

4.4.17 Notation, Mean and SD of the Variables used in Linear Regression Model to Estimate the Dependency of Independent Variables of Midnapur Santals over MPCE of Sample Households

4.4.18 Linear Estimation of Dependency over MPCE and other Independent Variables of Midnapur Santals across Sample Households

4.4.19 Notation, Mean and SD of the Variables used in Linear Regression Model to Estimate the Dependency of Independent Variables of Midnapur Mundas over MPCE of Sample Households

4.4.20 Linear Estimation of Dependency over MPCE and other Independent Variables of Midnapur Mundas across Sample Households

4.4.21 Notation, Mean and SD of the Variables used in Linear Regression Model to Estimate the Dependency of Independent Variables of Midnapur Bhumijs over MPCE of Sample Households

4.4.22 Linear Estimation of dependency over MPCE and other independent variables of Midnapur Bhumijs across sample Households

4.4.23 Notation, Mean and SD of the Variables used in Linear Regression Model to Estimate the Dependency of Independent Variables of Midnapur Lodhas over MPCE of Sample Households

4.4.24 Linear Estimation of Dependency over MPCE and other Independent Variables of Midnapur Lodhas across Sample Households

5.1.1 Social Protection Instruments on Food Security Objectives

5.2.1 Common Property Resources on Food Security Objectives

5.4.1 Monthly Income in Percentage (in Rs.) from CPRs to Total Income

5.4.2 Percentage of CPRs obtained across Income Class

5.4.3 Percentage of Monthly Per Capita Consumption (Food & Non Food) comes from CPRs

5.4.4 Percentage share of Food Security Programmes in MPCE of Food

5.5.1 Correlation Coefficient between MPCE and the other Independent Variable

5.6.1 Notation, Mean, and SD of the Variables used in Linear Regression Model to Estimate the Dependency of Independent Variables over MPCE of Sample Households

5.6.2 Linear Estimation of Dependency of MPCE and other Independent Variables of the Sample Households

5.7.1 Notation, Mean, and SD of the Variables used in Linear Regression Model to Estimate the Effect of SPPs and CPRs over the Tribes

5.7.2 Linear Estimation of SPPs and CPRs over sample Households

5.7.3 Notation, Mean, and SD of the Variables used in Probit Regression Model to Estimate the Effect of SPPs and CPRs over the Tribes

5.7.4 Probit Estimation of SPPs and CPRs over Sample Households on Poverty

5.7.5 Probit Estimation of SPPs and CPRs over Sample Households on Food Insecurity
