

List of Figures

<u>Contents</u>	<u>Page No.</u>
Figure 1: <i>Datura metel</i> in full bloom	21
Figure 2: <i>Datura stramonium</i> in full bloom	21
Figure 3: Flower of <i>Datura stramonium</i>	25
Figure 4: Flower of <i>Datura inoxia</i>	25
Figure 5: Herbarium of <i>Datura metel</i>	26
Figure 6: Herbarium of <i>Datura inoxia</i>	26
Figure 7: Herbarium of <i>Datura stramonium</i>	27
Figure 8: Pollen collection, sieving, storage and extraction	29
Figure 9: Gel filtration of <i>Datura</i> pollen extract	31
Figure 10: Fractions of pollen protein after gel filtration	31
Figure 11: White Rat being injected with pollen extract	33
Figure 12: Collection of blood serum from rat (by heart puncturing method)	33
Figure 13: A. lowering twig of <i>Datura metel</i> , A1. A single flower, B. Androecium and Gynoecium of <i>Datura metel</i> , B1. Pollen, C. Seed dispersal, D& E Seeds, F. Dimensions (size) of seeds	39
Figure 14: A. Plant material of <i>Datura stramonium</i> , B.A flower of <i>Datura stramonium</i> , C. Calyx, C1 Androecium and gynocoecium, D. Pollen, E&F. Seed dispersal, G. Seed, H. Dimensions (size) of seed	42
Figure 15: A. Plant of <i>Datura inoxia</i> , A1. A single leaf, B. Androecium and gynoecium, C. Immature fruit, D. Mature fruit, D1. Pollen (L.M model no Leica Dm-1000, magnification 40X), E. Seed dispersal, F. Seed.	45
Figure 16: Light Microscopic image of pollen of <i>Datura metel</i>	49
Figure 17: Light Microscopic image of pollen of <i>Datura stramonium</i>	49
Figure 18: Light Microscopic image of the pollen of <i>Datura inoxia</i>	50
Figure 19: Light Microscopic image of pollen of <i>Datura metel</i> showing 100% pollen purity	50
Figure 20: L.M image of pollen of <i>D. stramonium</i> showing 100% pollen purity	51

Figure 21:	L.M image of pollen of <i>D. inoxia</i> showing 100% pollen purity	51
Figure 22:	SEM image of pollen of <i>D. metel</i> showing 100% pollen purity	52
Figure 23:	SEM image of pollen of <i>D. stramonium</i> showing 100% pollen purity	52
Figure 24:	SEM image of pollen of <i>D. inoxia</i> showing 100% pollen purity	53
Figure 25:	Polar view of pollen of <i>D. metel</i> .	54
Figure 26:	Exine pattern at polar view of <i>D. metel</i>	54
Figure 27:	Equatorial view of pollen of <i>D. metel</i>	55
Figure 28:	Exine pattern at equatorial view	55
Figure 29:	Pollen of <i>D. metel</i> showing trichotomusculature	56
Figure 30:	Pollen showing furrow	56
Figure 31:	Polar view of pollen of <i>D. stramonium</i>	57
Figure 32:	Exine pattern at polar view of <i>D. stramonium</i>	57
Figure 33:	Equatorial view of pollen of <i>D. stramonium</i>	58
Figure 34:	Exine pattern at equatorial view <i>D. stramonium</i>	58
Figure 35:	Pollen of <i>D. stramonium</i> showing furrow	59
Figure 36:	Pollen of <i>D. stramonium</i> showing trichotomusculature	59
Figure 37:	Polar view of pollen of <i>D. inoxia</i>	60
Figure 38:	Exine pattern at polar view of <i>D. inoxia</i> .	60
Figure 39:	Equatorial view of pollen of <i>D. inoxia</i>	61
Figure 40:	Exine pattern at equatorial view	61
Figure 41:	Pollen of <i>D. inoxia</i> showing furrow.	62
Figure 42:	Pollen of <i>D. inoxia</i> showing trichotomusculature	62
Figure 43-46:	TEM images of pollen wall of <i>Datura metel</i>	64-65
Figure 47-48:	TEM images of pollen wall of <i>Datura stramonium</i>	66
Figure 49-50:	TEM images of pollen wall of <i>Datura inoxia</i>	67
Figure 51:	SDS-PAGE protein profile of the immature pollen of <i>Datura metel</i>	73
Figure 52:	SDS-PAGE protein profile of the mature pollen of <i>Datura metel</i> . (a) Molecular weight marker (b) BSA (66 kDa) (c) 40µl of protein sample.	73

Figure 53:	Comparative protein profile of the pollen of <i>Datura metel</i>	74
Figure 54-55:	SDS-PAGE profile of isolated protein fractions of <i>Datura metel</i>	77
Figure 56:	Serological precipitation reaction between pooled antiserum of <i>Datura metel</i> pollen sensitive patients and individual protein fractions of <i>Datura metel</i> "A" represents pooled human antiserum	80
Figure 57:	SDS-PAGE protein profile of mature pollen of <i>Datura stramonium</i>	84
Figure 58:	SDS-PAGE protein profile of the immature pollen of <i>Datura stramonium</i>	84
Figure 59:	Comparative protein profile of the pollen of <i>Datura stramonium</i>	85
Figure 60:	SDS-PAGE profile of isolated protein fractions of <i>Datura stramonium</i> .	88
Figure 61:	SDS-PAGE profile of isolated protein fractions of <i>Datura stramonium</i>	88
Figure 62:	Serological precipitation reaction between pooled antiserum of <i>Datura stramonium</i> pollen sensitive patients and individual protein fractions of <i>Datura stramonium</i> " A" represents pooled human antiserum	90
Figure 63:	SDS-PAGE protein profile of the pollen of immature pollen of <i>Datura inoxia</i> (a) & (b) 5µl and 10 µl of protein sample.	94
Figure 64:	SDS-PAGE protein profile of the pollen of mature pollen of <i>Datura inoxia</i>	94
Figure 65:	Comparative protein profile of the pollen of <i>Datura inoxia</i>	95
Figure 66:	SDS-PAGE profile of isolated protein fractions of <i>Datura inoxia</i>	98
Figure 67:	SDS-PAGE profile of isolated protein fractions of <i>Datura inoxia</i>	98
Figure 68:	Serological precipitation reaction between pooled antiserum of <i>Datura inoxia</i> pollen sensitive patients and individual protein fractions of <i>Datura inoxia</i> "A" represents pooled human antiserum	100
Figure 69-75:	Serological precipitation reactions	103-111
