

TABLE OF CONTENTS

Contents	Pages
Abbreviations	i
Abstract of thesis	iii
<i>Chapter 1: General Introduction</i>	1-16
1.1 Nutraceuticals	2
1.2 Uses of Nutraceuticals	6
1.3 Metal nanoparticles:	9
1.4 Uses of metal nanoparticles	12
1.5 References	14
<i>Chapter 2: Green synthesis of gold nanoparticles using Wendlandia wallichii, a potent wild edible plant consumed by the tribal of North-Eastern region in India</i>	17-46
2.1 Introduction	18
2.2 Materials and Methods	20
2.2.1 Plant materials	20
2.2.2 Chemicals	20
2.2.3 HPLC equipment	21
2.2.4 Proximate composition and minerals content in W .wallichii	21
2.2.4.1 Estimation of ash content	21
2.2.4.2 Estimation of moisture content	21
2.2.4.3 Estimation of crude fat content	22
2.2.4.4 Estimation of crude fibre content	22
2.2.4.5 Estimation of crude protein content	22
2.2.4.6 Estimation of carbohydrate content	23
2.2.4.7 Estimation of energy content	23
2.2.4.8 Estimation of minerals	24
2.2.4.9 Antioxidant activities of W. wallichii	24
2.2.4.10 Quantification of phenolic acids and flavonoids in the methanol extract of W .wallichii by HPLC	27

2.2.4.11	Biosynthesis of gold nanoparticles using methanol extract of W. wallichii	29
2.3	Results and Discussion	30
2.4	Conclusion	42
2.5	References	44

Chapter 3: Nutraceutical evaluation of Rhynchothecum ellipticum, a potent wild edible plant consumed by the tribal of North-Eastern region in India and green synthesis of gold nanoparticles using its leaf extract **47-76**

3.1	Introduction	48
3.2	Materials and Methods	50
3.2.1	Plant materials	50
3.2.2	Chemicals	50
3.2.3	HPLC equipment	51
3.2.4	Proximate composition and minerals content in <i>R. ellipticum</i>	51
3.2.4.1	Estimation of ash content	51
3.2.4.2	Estimation of moisture content	51
3.2.4.3	Estimation of crude fat content	51
3.2.4.4	Estimation of crude fibre content	52
3.2.4.5	Estimation of crude protein content	52
3.2.4.6	Estimation of carbohydrate content	53
3.2.4.7	Estimation of energy content	53
3.2.4.8	Estimation of minerals	53
3.2.4.9	Antioxidant activities of <i>R. ellipticum</i>	54
3.2.4.10	Quantification of phenolic acids and flavonoids in the methanol extract of <i>R. ellipticum</i> by HPLC	57
3.2.4.11	Biosynthesis of gold nanoparticles using methanol extract of <i>R. ellipticum</i>	59
3.3	Results and Discussion	60

3.4	Conclusion	72
3.5	References	73

Chapter 4: Green Synthesis and Characterization of Gold Nanoparticles using Bursera

	<i>Serrata Fruit Extract</i>	77-102
4.1	Introduction	78
4.2	Materials and Methods	79
4.2.1	Plant materials	79
4.2.2	Chemicals	79
4.2.3	HPLC equipment	80
4.2.4	Proximate composition and minerals content in <i>B. Serrata</i>	80
4.2.4.1	Estimation of ash content	80
4.2.4.2	Estimation of moisture content	80
4.2.4.3	Estimation of crude fat content	80
4.2.4.4	Estimation of crude fibre content	80
4.2.4.5	Estimation of crude protein content	81
4.2.4.6	Estimation of carbohydrate content	81
4.2.4.7	Estimation of energy content	81
4.2.4.8	Estimation of minerals	82
4.2.4.9	Antioxidant activities of <i>B.Serrata</i>	82
4.2.4.10	Quantification of phenolic acids and flavonoids in the methanol extract of <i>B. Serrata</i> by HPLC	84
4.2.4.11	Biosynthesis of gold nanoparticles using methanol extract of <i>B. Serrata</i>	86
4.3	Results and Discussion	87
4.4	Conclusion	98
4.5	References	99
