
CONTENTS

	Page no.
Abbreviations	i-vii
Chapter I:	1-17
General Introduction	
1.A. Carbohydrates	2
1.A.1. Classification of carbohydrates	2
1.B. Polysaccharide – the major component of carbohydrates	3
1.B.1. Classification of polysaccharides	3
1.B.2. Some common polysaccharides	5
1.C. Mushroom	
1.C.1. Chemical composition and nutritional value of edible mushrooms	9
1.C.2. A wild edible mushroom: <i>Termitomyces clypeatus</i>	10
1.C.3. An edible truffle <i>Tuber rufum</i> (Pico) var.: ectomycorrhizal mushroom	11
1.C.4. A wild edible mushroom: <i>Lentinus sajor-caju</i>	12
1.C.5. Mushroom polysaccharides	12
1.D. Biological activities of polysaccharides	13
1.E. Antioxidant activities of polysaccharides	15
1.F. Conclusions	17
Chapter II:	18-35
Methodology	
2.A. Isolation and purification of polysaccharides from edible mushrooms	19
2.A.1. Polysaccharide from <i>Termitomyces clypeatus</i> (R. Heim)	19

Contents

2.A.2. Polysaccharides from <i>Tuber rufum</i> (Pico) var.....	20
2.A.3. Polysaccharides from <i>Lentinus sajor-caju</i>	20
2.B. Determination of physical properties	
2.B.1. Optical rotation measurement.....	21
2.B.2. Molecular weight determination.....	21
2.C. Structural analysis of polysaccharides	21
2.D. Chemical analysis	
2.D.1. Monosaccharide analysis.....	21
2.D.2. Determination of absolute configuration	22
2.D.3. Linkage analysis	
2.D.3.1. Methylation analysis	23
2.D.3.2. Periodate oxidation study	23
2.D.3.3. Smith degradation	24
2.E. Nuclear magnetic resonance (NMR) Spectroscopy	24
2.E.1. Preparation of NMR sample and instrumentation	25
2.E.2. One-dimensional (1D) NMR	
2.E.2.1. ¹ H NMR.....	25
2.E.2.2. ¹³ C NMR.....	25
2.E.2.3. DEPT-135.....	26
2.E.3. Two-dimensional (2D) NMR	
2.E.3.1. Total correlation spectroscopy (TOCSY).....	26
2.E.3.2. Double quantum filtered correlation spectroscopy (DQF-COSY).....	27
2.E.3.3. Nuclear overhauser enhancement spectroscopy (NOESY).....	27
2.E.3.4. Rotating frame overhauser enhancement spectroscopy (ROESY).....	28
2.E.3.5. Heteronuclear single quantum coherence (HSQC).....	28
2.E.3.6. Heteronuclear multiple bond correlation (HMBC).....	28
2.F. Antioxidant properties	
2.F.1. Chelating ability of ferrous ions.....	28

2.F.2. Reducing power.....	29
2.F.3. Superoxide radical scavenging assay.....	29
2.F.4. Hydroxyl radical scavenging activity.....	30
2.F.5. DPPH radical scavenging activity.....	30
2.F.6. ABTS radical scavenging assay.....	31
2.G. Biological activity	
2.G.1. Cell viability.....	32
2.G.2. Determination of reduced glutathione (GSH).....	33
2.G.3. Determination of Oxidized glutathione level (GSSG).....	33
2.G.4. Determination of lipid peroxidation (MDA).....	33
2.G.5. NO release assay.....	34
2.G.6. ROS generation.....	34
2.G.7. Statistical analysis.....	35
2.H. Conclusion.....	35

Chapter III: 36-60

**Heteroglycan of an edible mushroom *Termitomyces clypeatus*:
Structure elucidation and antioxidant properties**

3.A. Introduction and review of earlier works.....	37
3.B. Present work on PS	
3.B.1. Isolation and purification of polysaccharide.....	38
3.B.2. Structural analysis of PS	
3.B.2.1. Chemical analysis	41
3.B.2.2. 1D and 2D NMR analysis.....	44
3.B.3. Antioxidant properties of PS	
3.B.3.1. Chelating ability of ferrous ions.....	56
3.B.3.2. Reducing power	57
3.B.3.3. Superoxide radical scavenging assay.....	57
3.C. Conclusion	60

Chapter IV:	61-90
Polysaccharide of an edible truffle <i>Tuber rufum</i>: Structural studies and effects on human lymphocytes	
4.A. Introduction and review of earlier works.....	62
4.B. Present work on PS-II	
4.B.1. Isolation, fractionation, and purification of PS-II.....	64
4.B.2. Structural analysis of PS-II	
4.B.2.1. Chemical analysis.....	66
4.B.2.2. 1D and 2D NMR analysis.....	71
4.B.3. Biological activities of PS-II.....	83
4.C. Conclusion	90
Chapter V:	91-118
Studies on structure and antioxidant properties of a heteroglycan isolated from wild edible mushroom <i>Lentinus sajor-caju</i>.	
5.A. Introduction and review of earlier works.....	92
5.A.1. Polysaccharides from mushrooms.....	92
5.A.2. Collection and identification.....	93
5.B. Present work on PS-I	
5.B.1. Isolation and purification.....	93
5.B.2. Physical characterization of PS-I.....	93
5.B.3. Structural analysis of PS-I	
5.B.3.1. Chemical analysis	96
5.B.3.2. 1D and 2D NMR analysis.....	100
5.B.4. Antioxidant activities of PS-I	
5.B.4.1. DPPH radical scavenging activity.....	111
5.B.4.2. Hydroxyl radical scavenging activity.....	112

Contents

5.B.4.3. Reducing power.....	113
5.B.4.4. ABTS radical scavenging assay.....	114
5.B.4.5. Chelating ability of ferrous ion.....	115
5.C. Conclusion	118
Conclusion	119-120
Summary	121-125
Bibliography.....	126-137
