

List of Tables

Table No.	Description	Page No.
1.1	Values of magneto-crystalline anisotropy constant (K_1) of some ferrites at room temperature.	29
1.2	Different types of ferrites and their examples.	40
1.3	Ionic radii of different cations in spinel ferrite.	42
1.4	Curie temperature (T_C) and saturation magnetization (M_s) of some ferrite.	52
4.1	Quantitative analysis of XRD pattern of Mo doped Co-Zn ferrite samples.	137
5.1	Activation energy calculated from different Arrhenius plots of doped Co-Zn ferrite samples.	160
6.1	The ac conductivity parameters estimated from Jonscher's plot.	166
6.2	List of calculated activation energy E_p and E_f at different frequencies.	170
