

## Acknowledgement

The journey of my doctoral research was unfulfilled without the timely help from those at the beginning of this venture. Now, I take an opportunity to express my gratitude to them whose ceaseless support enabled me to complete the experimental work into a final shape of my thesis.

It is indeed a pleasure to express my deep sense of gratitude, regards, and heartfelt appreciation to my research supervisors, Dr. Tapash Chandra Ghosh and Dr. Bikas Ranjan Pati for their enlightening guidance, constant encouragement and help at each stage of my research. I am grateful to them for getting friendship, philosophy and guidance in my life apart from research. As a scholar, I am also beholden to them since July 2009 for their intense guidance, innovative idea, constant encouragement and valuable suggestions throughout the period of my research work. Their perpetual inspiration and I wish to carry on in my future life. During my personal and professional troubles, I was overwhelmed by their constant support and encouragement.

My sincere thanks and regards to Dr. Keshab Chandra Mondal, Associate Professor, Department of Microbiology, who has been a constant source of support, love and guidance to me. I will never forget the humane touch I received from him. My sincere thanks to all esteemed faculty members of the Department. I am grateful to Dr. Pradeep K. Das Mohapatra, Dr. Suman K. Halder, Dr. Santi M. Mandal (ex-faculty member), Mr. Amit K. Mandal, and Mr. Debesh Bhattachariya for their encouragement and support. I also take this opportunity to thank Dr. Sawati Parua (Mondal), Department of Physiology, Bajkul Milani Mahavidyalaya, Purba Medinipur, West Bengal, India; for providing timely help and valuable suggestions. I extend my thanks to for his suggestions and support in my research work.

I would like to extend also my thanks to Dr. Sandip Chakroborty, who during his tenure in Bose Institute, Kolkata was a constant source of help and ideas. I will miss the enlightening discussions we had.

My sincere thanks are also to Honourable Vice-Chancellor Professor Ranjan Chakrabarti & Professor Nanda Dulal Paria and Chairman of Ph. D. Committee, Department of Microbiology, Vidyasagar University, Midnapore, India for their kind, recommendation, endless cooperation and constant help for my research work. I extend my equal sense of gratitude to the Registrar, Vidyasagar University, Midnapore for providing me all the facilities needed for successful completion of this work.

Financial assistance provided by Bioinformatics Division, DBT, Government of India, New Delhi for my research is duly acknowledged.

I am thankful to all my lab mates and friends, Kuntal, Atanu, Arijit, Arpan, Chiranjit, Prasenjit, Tanmay, Amrita, Shilpee, Ridha, Mousumi, Tithi, Dipak Da, Krisanu Da, Avik, Jyoti, Aritra and Papan for their assistance and scientific support and let me spend my whole period with them like a family. A special thanks to Tanmoy Roy, my school friend who is now working at TCS, Kolkata for various IT related helps.

A special thanks to Upasana Chatterjee and Santanu Chowdhury, Lab-technician of our department for all the counseling and motivation. It was fun working with them. I would also acknowledge Jhareshwar Chalak, and Suresh Da, non-teaching staff of my department for their help during my stay in the department. I would like to thank my students too, as learning in class is always bi-directional.

It was due to euphemistic and exquisite sense of my parents and wife as without their constant support and motivation, this journey would not have been possible. They instilled in me the confidence to drive through this journey. My highest gratitude goes to them.

Last but not the least, I take this opportunity to offer my heartfelt homage to Pandit Ishwar Chandra Vidyasagar, after the name of whom this University has been founded.

Success is sweet because of all of these wonderful people.
