

List of tables

Chapter 2:

Page 29 : Table 1: First twenty data rows depicting measurement of centrality values used in this work.

Page 31: Table 2: First twenty data rows depicting peptide length values used in this work.

Page 35: Table 3: First twenty data rows depicting protein disorderness values (disorderness length and percentage of disorder)used in this work.

Page 38: Table 4 : First twenty data rows depicting position of the given gene in leading or lagging strand .

Page 42: Table 5: First twenty data rows depicting measurement of protein abundance values used in this work.

Page 45: Table 6: First twenty data rows depicting protein expression level values used in this work.

Page 56: Table 7 : First twenty data rows depicting frequency of rare codons used in this work.

Page 59: Table 8 : First twenty data rows depicting complex number of proteins used in this work.

Chapter 3:

Page 78: Table 9: Accuracy of prediction for individual parameters

Page 80: Table 10: Influence of individual parameters on the overall predictability

Page 81: Table 11: Result of the predictive modelling of the entire dataset
