

ACKNOWLEDGEMENT

It is a great pleasure to thank all those people who have supported me during my Doctoral studies. The completion of this dissertation would not have been possible without the help, guidance, encouragement, and cooperation of intellectuals, elders, and many professional acquaintances. I would like to thank all the people who have helped me, in one way or another, to complete my research work.

I take this opportunity to express my overwhelming gratitude, regards, and respect to my supervisors Dr. Biswapati Jana, Department of Computer Science, Vidyasagar University, Paschim Medinipur, West Bengal and Professor Niranjana Kumar Mandal, Ex-Controller of Examination, Vidyasagar University, Paschim Medinipur, West Bengal for proposing topics of the present Ph.D. thesis and for introducing me to the magnificent field of research in Computer Science. I am deeply indebted to them for their constant encouragement, constructive criticism, wise and valuable suggestions received all through the period of this investigation. Their knowledge, kindness, patience, sincerity, and vision have provided me with lifetime benefits.

Besides my supervisors, I would like to express my earnest and the true sense of gratitude to Dr. Pabitra Pal, Project Scientist, IIT Delhi and Mr. Partha Chowdhuri, Assistant Professor, Department of Computer Science, Vidyasagar University, West Bengal, for their continuous contribution with valuable guidance, invaluable ideas, and encouragement. They provided a solution to problems throughout this work. I am truly indebted to them for their compassionate support.

I take this privilege to convey my regards to Professor Ranjan Chakrabarti, Honorable Vice-Chancellor and Dr. Jayanta Kishore Nandi, Registrar, for providing me all facilities needed to carry out my research work.

I would like to express my deep gratitude to Prof. Satyajit Saha, Co-ordinator, Department of Computer Science, Vidyasagar University, for his inspiration and support during my research work.

I convey my sincere gratitude to Dr. Tanushree Mandal and Dr. Sharmistha Haldar Jana due to their guidance and support at every stage of my Ph.D. study. I am extremely thankful and convey my regards to Mr. Sanatan Ghosh, my teacher, to show me right direction to solve this challenging problem.

I also convey my heartfelt thanks to the faculty members of the Department of Computer Science, Vidyasagar University, for their encouragement and help in different ways. I would like to thank all the technical and non-teaching staff of the Department of Computer Science, Vidyasagar University, for supporting and providing me the best facilities and a wonderful work environment. Without their support and blessings, this work would not have taken its shape.

I would like to extend my sincere thanks to Mr. Prabhas Kumar Singh, Assistant Professor, Department of Computer Science, Vidyasagar University, for his guidance and support throughout this research endeavour.

I would like to express my gratitude to co-researchers Dr. Ramkrishna Das, Dr. Soumen Kanrar, and Sourav Kaity for their encouragement and helpful suggestions.

Lastly, I must acknowledge my debt for those who have constantly inspired, encouraged and helped me. I would like to bow down to my first Guru, my parents who led foundation by generating a quest of knowledge in my mind and for making me competent enough for research. It is almost impossible for me to express any formal gratitude

to my parents and my two elder sisters and brother, without whom the execution of this work would not have been possible. I owe my sincere thanks to them for their unconditional love, encouragement, everlasting patience, sacrifice, support, and blessings. I acknowledge my debt to my beloved elder sisters, Madhumita and Monimala, for their continuous support. I ardently acknowledge my debt to my brother, Rajdip, for his motivation, co-operation, and psychological support to keep the momentum of this research work.
