

# CONTENTS

Chapters	Page No.
<b>1. General Introduction</b>	<b>1-5</b>
1.1 Background of the study	1-4
1.2 Aims and Objectives	5
<b>2. Review of Literature</b>	<b>6-21</b>
2.1 Indian Aquaculture scenario	6-7
2.2 Diseases in aquaculture	7-9
2.3 Dynamics of Fish Diseases	9-10
2.4 Types of diseases	10
2.4.1 Non infectious diseases	10
2.4.1.1 Environmental conditions	10
2.4.1.2 Nutritional diseases	10-11
2.4.1.3 Genetic Disorder and Neo plastic abnormalities	11
2.4.2 Infectious diseases	11
2.4.2.1 Bacterial diseases	12
2.4.2.2 Parasitic diseases	12
2.4.2.3 Fungal diseases	13
2.4.2.4 Viral diseases	13
2.5 The Genus <i>Klebsiella</i>	16
2.6 <i>Klebsiella pneumoniae</i>	16-17
2.7 Infection report of <i>Klebsiella pneumoniae</i>	17-18
2.8 Virulence property of <i>Klebsiella pneumoniae</i>	18-20
2.9 Diagnosis of <i>Klebsiella pneumoniae</i>	21

---

<b>3. Materials and Methods</b>	<b>22-59</b>
3.1. Materials	22-23
3.1. 1 Equipments	22
3.1. 2 Media	22
3.1. 3 Chemicals	23
<b>3.2 Methodology</b>	<b>24-59</b>
3.2.1 Sampling of diseased fish	24-25
3.2.2 Preparation of different medias	26-27
3.2.2.1 Preparation of reagents	28-30
3.2.3 Isolation of causative pathogen from diseased sample	31
3.2.4 Biochemical identification of bacterial isolates	32
3.2.5 Genomic DNA Isolation	33
3.2.6 Agarose gel electrophoresis	34
3.2.7 Quantification of the DNA	34
3.2.8 16S rRNA gene amplification	34
3.2.9 DNA sequencing and NCBI submission	35
3.2.10 Phylogenetic analysis	35-36
3.2.11 PCR Ribotyping	40
3.2.12 Antibiotic susceptibility test and Multiple Antibiotic resistances (MAR)	40-41
3.2.13 Solid hemolysin test and liquid hemolysin assay	41-42
3.2.14 Fish Acclimatization for Experimental Challenge	43
3.2.15 Determination of LD <sub>50</sub> of <i>K. pneumoniae</i> in <i>Labeo rohita</i>	43-44

---

---

3.2.16 Histopathology	44-46
3.2.17 String Test for Hypermucoviscosity	47
3.2.18 Detection of virulence genes in <i>Klebsiella pneumoniae</i> isolates	47-48
3.2.19 Sequencing and NCBI Submission	49
3.2.20 Challenge test for Non- specific immune response and specific gene expression studies	49
3.2.20.1 Experimental design	49
3.2.21 Non Specific immune response	50
3.2.21.1 Sampling and blood collection	50
3.2.21.2 Respiratory burst activity	50
3.2.21.3 Myeloperoxidase activity (MPO)	51
3.2.21.4 Total antiproteases activity	52
3.2.21.5 Alpha-2 macroglobulin ( $\alpha$ -2 M) activity	53
3.2.21.6 Lysozyme activity	54
3.2.22 Gene expression study	55
3.2.22.1 Sample collection of RNA isolation	55
3.2.22.2 RNA isolation	55-56
3.2.22.3 DNase treatment	56
3.2.22.4 Quantification of the RNA	56-57
3.2.22.5 cDNA Synthesis	57
3.2.22.6 Quantitative Real Time PCR (qRT-PCR)	58-59
3.2.23 Statistical analysis	59
<b>4. Results</b>	<b>60-81</b>
4.1 Microbiological isolation of <i>Klebsiella pneumoniae</i>	60

---

---

4.2 Biochemical identification of the isolated strains	60-62
4.3 Genomic DNA and 16S rRNA PCR analysis	63
4.4 Molecular identification and NCBI accession number	63-64
4.5 Phylogenetic analysis of the isolated bacterial strains	54-67
4.6 PCR ribotyping of <i>Klebsiella pneumoniae</i> isolates	68
4.7 Antibiogram sensitivity study and MAR index determination	69
4.8 Solid hemolysin assay and Liquid hemolysin assay	70
4.9 <i>In vivo</i> pathogenicity test	71
4.10 LD <sub>50</sub> determination of <i>Klebsiella pneumoniae</i>	72
4.11 Histopathological findings	73
4.12 String Test for Hypermucoviscosity	74
4.13 Molecular identification of the virulent genes	74
4.14 Innate immunity parameters or Non specific immune response	75
4.14. 1 NBT superoxide/ respiratory burst assay	75
4.14. 2 Myeloperoxidase (MPO) activity	76
4.14. 3 Total antiproteases activity	77
4.14. 4 $\alpha$ -2 Macroglobulin assay	78
4.14. 5 Lysozyme activity	79
4.15 Specific immune response	79-80
4.15. 1 C3 gene expression level	79
4.15. 2 IL6 gene expression level	80
4.15. 3 IL- 1 $\beta$ gene expression level	80
<b>5. Discussion</b>	<b>82-94</b>

---

---

<b>6. Conclusion</b>	<b>95</b>
<b>7. Summary</b>	<b>96-98</b>
<b>8. Bibliography</b>	<b>99-135</b>
<b>Publications</b>	

---
