

## **Acknowledgement**

I heartily expressed my regards to my respected guides Dr Sandip Chattopadhyay, Associate Professor, Bio-Medical Laboratory Science and Management, Vidyasagar University and Dr Smarajit Maiti, Associate Professor & Head, Department of Biochemistry, Oriental Institute of Science and Technology, Vidyasagar University, for their endless inspiration, valuable enthusiastic advice and guidance, without which it would have been impossible for me to overcome the present work.

I also express my thanks Dr. Amiya Kumar Hati, Former Director, School of Tropical Medicine, Calcutta for his kind valuable notes and guidance.

I also deeply indebted to Prof. Asok Kumar Maiti, Midnapore Medical College and Hospital, Paschim Medinipur for his kind co-operation and providing space in his laboratory to carry out an important part of my research work.

I also thanks to all my colleagues Mr. Bappaditya Pan, Mr. Nirmallya Acharyya, Hasina Perveen, Mrs.Moulima Maity, Shamima Khatun, Mrs. Moumita Dash, Mr. Pikash Pratim Maity for their helping attitude in every step during progression of my research work.

I give a vote of thanks to Central Instrumental Lab. of Vidyasagar University for giving opportunity to use their instrument and their helping attitude.

I do express my thanks and regards to a good number of scientists of different countries who have taken pains to mail their copies of published works in response to my request.

I express my deep regards and gratitude to my father Sri Sashibhusan Deb and my mother late Labangabala Deb for their moral support and blessing is the inspiration to complete my Ph.D. thesis.

Last but not the least, I shall do an injustice to my wife Mrs. Tinku Dey Deb and my only son Mastar Parthasarathi Deb, if I do not mention in this acknowledgement for their loving inspiration, sacrifice and instant co-operation in accordance to the way of the completion in regarding this thesis work.

**Bimal Deb**
