

## ACKNOWLEDGEMENTS

This daunting research work has never been an easy one. For the completion of this work I am really indebted to some kind, helpful and erudite persons for their continued guidance, encouragement and support. Without them it would have been difficult for me to explore the topic in the given manner.

In the roll of honour, I would like to express my unarmed gratitude to my supervisors Prof. (Dr.) Debashis Bandyopadhyay and Dr. Subhajit Sen Gupta for their patience, pertinence and perseverance in motivating the moulding of a blob of clay into a specific pattern.

The respected faculty members of Vidyasagar University Prof. (Dr.) Joyjit Ghosh and Prof. (Dr.) Indranil Acharya also deserve special mention for their help and advice.

Dr. Aparajita Hazra of Sidhu-Kanho-Birsha University also deserves special mention. In my pre-submission presentation her insightful comments helped me immensely to sort out certain grey areas of my understanding.

Besides, I would also like to express my heart-felt gratitude to Dr. T.K. Dey for his unflagging guidance and untiring encouragement which incited me to widen my study and researching from various perspectives.

I would be failing in my duty if I don't express my gratitude to Prof. Basudev Paul who galvanized the stupor in me and brought me into the spick and span mode by suggesting the invaluable.

Last but not the least; I would like to thank my family members – especially my two angels, Aricia and Arkamita who helped me immensely by not tearing the valuable.
