Chapter 1 Introduction	1
1.1 Introduction	1
1.2 Theme of the study	4
1.3 Selection of the Study area	5
1.4 Problem selection	5
1.5 Objectives	6
1.6 Literature Review	6
1.7 Data base	19
1.8 Methodology	20
1.9 Flowchart of the research work	22
1.10 Limitation	23
Chapter-2 Geographical aspect of the study area	24
2.1 Introduction	24
2.2 Geographical location of the study area	24
2.3 Administrative set up	25
2.4 Physical set up	29
2.4.1 Geology	29
2.4.2 Topography	29
2.4.3 Soil	30
2.4.4 Drainage System	34
2.4.5 Tidal behaviour of river	39
2.4.6 Climate	42
2.4.7 Natural Vegetation	43
2.5 Demography	43
2.6 Transport and Communication	48
Chapter-3 Distribution of agro natural resources	51
3.1 Introduction	51
3.2 Agriculture	52
3.2.1 Type of agriculture	52
3.2.2 Types of cropping system	54
3.2.3 Types of crops and its' distribution	55

3.3	Vegetation	63
3.3.1	Forestry by Government and Semi-Government organization	64
3.3.2	Forestry by Farmer	65
3.4	Fishery	67
Chapter-4 Status of agro-natural resource production and its' utilization		70
4.1	Introduction	70
4.2	Nature of agricultural landuses	70
4.2.1.	Cultivated land and other landuse	71
4.2.2.	Seasonal nature of agricultural landuse	73
4.2.3.	Cropping pattern and landuse	77
4.3	Status of production and utilization of agricultural crops	87
4.3.1	Present status of production of agricultural crops	87
4.3.2	Growth rate of agricultural crop production	90
4.3.3	Growth rate of flower production	92
4.3.4	Utilization status of agricultural crops	94
4.4	Status of production and utilization of forest resources	96
4.5	Fisheries: Assessment in terms of environment	98
Chapter-5 Sustainable management of agro natural resources		106
5.1	Introduction	106
5.2	Physiographic micro-zonation for agro natural resources management	107
5.3	Agricultural landuse management	129
5.4	Landuse in terms of fishery	137
Chapter-6 Major findings and conclusion		144
6.1	Major findings	144
6.2	Conclusion	147
6.3	Future scope	149
References		150
Annexure		157
