

CONTENTS

List of Tables

List of Figures

List of Abbreviations

Chapter 1

1.1. Introduction.....	1-9
1.2. Literature Review.....	10-59
1.2.1. Synthesis technique and characterization.....	10
1.2.2. Gas Sensor.....	34
1.2.3. Heterojunction Solar Cell.....	41
1.2.4. Dye Sensitized Solar Cell.....	49
1.2.5. Interaction of nanoparticles with protein.....	54

Chapter 2

Different Tools and Techniques for Characterization of SnS Nanostructured Materials..... 60-72

2.1. Principle of characterization.....	61
2.1.1. Principle of X-ray diffraction (XRD).....	61
2.1.2. Principle of Transmission Electron Microscope (TEM).....	62
2.1.3. Principle of Atomic Force Microscopy (AFM).....	64
2.1.4. Principle of Raman Spectroscopy.....	65
2.1.5. Principle of Absorption Spectroscopy.....	66
2.1.6. Principle of Photoluminescence Spectroscopy (PL).....	69

2.1.7. Principle of Time-Correlated Single Photon Counting (TCSPC).....	71
---	----

Chapter 3

Synthesis Procedure and Structural, Optical, Electrical Characterization of SnS Nanostructured Materials.....	73-136
--	---------------

3.1. Structural and Optical Characterization of SnS Nanoparticles Grown by Chemical Reduction Route.....	73-80
---	--------------

3.1.1. Experimental section.....	73
----------------------------------	----

3.1.2. Results and discussion.....	74
------------------------------------	----

3.1.2.1. XRD study.....	74
-------------------------	----

3.1.2.2. TEM and SEM study.....	75
---------------------------------	----

3.1.2.3. EDX analysis.....	77
----------------------------	----

3.1.2.4. Optical properties.....	77
----------------------------------	----

3.1.2.5. Photoluminescence spectroscopy.....	78
--	----

3.1.2.6. AFM study.....	79
-------------------------	----

3.1.2.7. Summarization table.....	80
-----------------------------------	----

3.1.3. Conclusion.....	80
------------------------	----

3.2. Structural and Optical Characterization of SnS Nanoparticles Grown at Room Temperature using Wet Chemical Precipitation Method.....	81-87
---	--------------

3.2.1. Experimental section.....	81
----------------------------------	----

3.2.2. Results and discussion.....	82
------------------------------------	----

3.2.2.1.	XRD studies.....	82
3.2.2.2.	TEM and ED studies.....	83
3.2.2.3.	FESEM study.....	83
3.2.2.4.	AFM analysis.....	84
3.2.2.5.	Optical absorption study.....	85
3.2.2.6.	Photoluminescence study.....	85
3.2.2.7.	Summarization table.....	86
3.2.3.	Conclusion.....	87
3.3.	Structural, Optical and Electrical Characterization of SnS Nanoparticles Grown by Varying Growth Temperature through Wet Chemical Precipitation Method.....	88-102
3.3.1.	Experimental section.....	88
3.3.2.	Results and discussion.....	89
3.3.2.1.	Structural study using XRD and Raman spectroscopy.....	89
3.3.2.2.	Morphological study.....	91
3.3.2.3.	AFM analysis.....	92
3.3.2.4.	Composition analysis.....	93
3.3.2.5.	UV–Vis absorption spectroscopy study.....	94
3.3.2.6.	Photoluminescence spectroscopy study.....	95
3.3.2.7.	Time-Correlated Single Photon Counting (TCSPC) study.....	96
3.3.2.8.	Electrical properties study.....	97
3.3.2.9.	Comparison table	101
3.3.3.	Conclusion.....	101

3.4. Structural and Optical Characterization of SnS Nanoparticles Grown by Varying Reagent Ratio using Wet Chemical Precipitation Method.....	103-110
3.4.1. Experimental section.....	103
3.4.2. Results and discussion.....	104
3.4.2.1. Structural analysis by X-ray diffraction (XRD).....	104
3.4.2.2. Morphological analysis by TEM and FESEM.....	105
3.4.2.3. EDAX analysis.....	106
3.4.2.4. Optical absorption study.....	108
3.4.2.5. Photoluminescence study.....	109
3.4.2.6. Summarization table.....	110
3.4.3. Conclusion.....	110
3.5. Synthesis and Characterization of Fe-doped SnS, Mn-doped SnS and pure SnS using Wet Chemical Precipitation Method.....	111-119
3.5.1. Experimental section.....	111
3.5.2. Results and discussion.....	112
3.5.2.1. XRD analysis.....	112
3.5.2.2. TEM and FESEM study.....	113
3.5.2.3. EDAX study.....	115
3.5.2.4. Optical absorption (UV-vis) study.....	115
3.5.2.5. Photoluminescence study.....	117
3.5.2.6. TCSPC analysis.....	117
3.5.2.7. Comparison table.....	119

3.5.3. Conclusion.....	119
3.6. Synthesis and Characterization of SnS and SnS-Ag Nanocomposites by Solvothermal Method	120-127
3.6.1. Experimental section.....	120
3.6.2. Results and discussion.....	122
3.6.2.1 XRD study.....	122
3.6.2.2 TEM study.....	123
3.6.2.3 FESEM study.....	123
3.6.2.4 EDX study.....	124
3.6.2.5 UV-VIS spectroscopy study.....	124
3.6.2.6 Photoluminescence spectroscopy study.....	125
3.6.2.7 TCSPC study.....	126
3.6.2.8. Comparison table.....	127
3.6.3. Conclusion.....	127
3.7. Green synthesis and Characterization of SnS Nanoparticles using the Extraction of Gymnema Sylvestre leaves	128-136
3.7.1. Experimental section.....	128
3.7.1.1. Materials.....	128
3.7.1.2. Collection and extraction of plant samples.....	128
3.7.1.3. Chemically synthesis of SnS NPs.....	129
3.7.1.4. Green synthesis of SnS NPs.....	129
3.7.2. Sample characterization.....	129

3.7.3. Results and discussion.....	130
3.7.3.1. Structural study.....	130
3.7.3.2. Morphology study.....	131
3.7.3.3. Composition study.....	132
3.7.3.4. UV-VIS spectroscopy study.....	133
3.7.3.5. Photoluminescence spectroscopy study.....	134
3.7.3.6. Comparison table.....	135
3.7.4. Conclusion.....	135

Chapter 4

Fabrication and Characterization of Gas Sensor based on grown SnS Nanoparticles137-148

4.1. Experimental Section	138
4.1.1. Fabrication of Gas Sensor.....	139
4.2. Results and discussion.....	140
4.2.1. Gas sensing properties.....	140
4.2.2. Gas sensing mechanism.....	145
4.2.3. Comparison tables.....	147
4.3. Conclusion.....	148

Chapter 5

Fabrication, Characterization, Comparison of p-SnS/n-Si and p-SnS:Ag/n-Si Heterojunction Solar Cell149-159

5.1.	Experimental section.....	151
5.1.1.	Fabrication of photovoltaic device.....	151
5.1.2.	Electrical contact fabrication.....	152
5.2.	Plasmonic mechanisms.....	152
5.3.	Results and discussion.....	154
5.3.1.	Performance of solar cells.....	154
5.3.2.	Comparison tables.....	158
5.4.	Conclusions.....	159

Chapter 6

	Dye Sensitized Solar Cell based on SnS Nanoparticles.....	160-174
--	--	----------------

6.1.	Fabrication and Characterization of Natural Dye Sensitized Solar Cells based on SnS.....	162-168
-------------	---	----------------

6.1.1.	Experimental section.....	162
6.1.1.1.	Preparation of samples.....	162
6.1.1.2.	Preparation of natural dye sensitizer.....	162
6.1.1.3.	Fabrication of Dye Sensitized Solar Cells.....	163
6.1.2.	Charge transfer mechanism.....	164
6.1.3.	Material characterization.....	165
6.1.4.	Results and discussion.....	165
6.1.4.1.	Performance of DSSCs.....	165
6.1.4.2.	Comparison tables.....	167
6.1.5.	Conclusions.....	168

6.2. Fabrication and Characterization of Dye Sensitized Solar Cell based on Green Synthesized SnS Nanoparticles.....	169-174
6.2.1. Experimental section.....	170
6.2.1.1. Preparation of samples.....	170
6.2.1.2. Preparation of natural dye sensitizer.....	170
6.2.1.3. Fabrication of DSSCs.....	170
6.2.2. Sample characterization.....	171
6.2.3. Results and discussion.....	171
6.2.3.1. Characteristics of dye sensitized solar cells.....	171
6.2.3.2. Comparison tables.....	173
6.2.4. Conclusions.....	173

Chapter 7

Study of Molecular Interaction of SnS Nanoparticles with Bovine Serum Albumin.....175-184

7. 1. Experimental section.....	177
7.1.1. Sample preparation.....	177
7.1.2. Sample characterization.....	177
7. 2. Results and discussions.....	178
7.2.1. Study of X-ray diffraction (XRD).....	178
7.2.2. Transmission electron microscopy (TEM) study.....	179
7.2.3. TCSPC study.....	180

7.2.4. UV-vis spectroscopy study.....	181
7.2.5. Fluorescence quenching study.....	182
7.3. Conclusion.....	184

Chapter 8

Conclusions and Future Prospects.....	185-187
References.....	188-204
List of Publications.....	205-206
