Certificate	i
Abstract	ii-iii
Declaration	iv
Acknowledgement	v
Contents	vi-xiii
List of Tables	xiv-xv
List of Figures	xvi-xxii
List of Plates	xxiii-xxvi
List of Abbreviations	xxvii

PART-I

Chapter-1 Introduction

Introduction	1
1.1 Conceptual Framework	6
1.2 Study Area	8
1.2.1 Reason for selection of the study area	8
1.2.2 Location of the study area	9
1.3 Research Problem	10
1.4 Objectives of the study	13
1.5 Methodology	13
1.5.1 Collection of Secondary data and maps	13
1.5.2 Field survey and monitoring	13
1.5.3 Data analysis in GIS Platform and Statistical software	14
1.5.4 Synthesis and analysis	15
1.6 Data sources	15
1.7 Review of the literature	16
1.8 Significance of the present Research	25

1.9 Limitations.	26
1.10 Arrangement of the Thesis	27

Chapter-2 About the Study Area

Introduction	28
2.1 Physiography	28
2.2 Geomorphology	31
2.3 Climate	32
2.4 Drainage	33
2.5 Geology	33
2.6 Soil	39
2.7 Land Use and Land Cover (LULC)	42
2.8 Natural Vegetation	43
2.9 Road and Railway	44
2.10 Demographic Aspects	45
2.11 Level of Literacy	46
2.12 Social Structure	46
2.13 Work Participation	47
Major Findings	47
Conclusion.	49

Chapter-3 Basin Morphometry

Introduction	50
3.1 Data and methodology	51
3.2 Linear Aspects	52
3.2.1 Stream Order (S_u)	52
3.2.2 Stream Number (N_u)	52
3.2.3 Stream Length (L_u) Kms	53
3.2.4 Mean Stream Length Ratio (L_{urm})	54

3.2.5 Stream Length Ratio (L_{ur})	55
3.2.6 Bifurcation Ratio (R_b)	55
3.2.7 Weighted Mean Bifurcation Ratio (R_{bwm})	55
3.2.8 Rho Coefficient (ρ)	56
3.2.9 Main Channel Length (Cl) Kms	56
3.2.10 Basin Length (L_b) Kms	56
3.3 Areal Aspects	56
3.3.1 Basin Area (A) km^2	56
3.3.2 Basin Perimeter (P) kms	57
3.3.3 Length area relation (L_{ar}), kms	57
3.3.4 Lemniscate's Value (K)	57
3.3.5 Basin Shape	57
3.3.5.1 Elongation Ratio (R_e)	57
3.3.5.2 Form Factor (R_f)	58
3.3.5.3 Circulatory Ratio (R_c)	58
3.3.6 Drainage Area (A_u)	59
3.3.7 Drainage Density (D_d)	59
3.3.8 Drainage Frequency (F_s) km/km^2	60
3.3.9 Drainage Texture (km/km^2)	60
3.3.10 Drainage Intensity (D_i)	61
3.3.11 Infiltration Number (I_f)	61
3.3.12 Length of overland flow (L_g) kms	61
3.3.13 Constant of channel maintenance (C)	62
3.4 Relief Aspects	62
3.4.1 Slope	62
3.4.2 Aspect	63
3.4.3 Relief	63
3.4.4 Channel Gradient	64
3.4.5 Basin Relief (H)	64

3.4.6 Relief Ratio (Rh)	64
3.4.7 Ruggedness Number (Rn)	65
3.4.8 Longitudinal Profile	65
3.4.9 Hypsometric Curve	66
3.4.10 Estimation of Hypsometric Integral (HI)	70
Major Findings	72
Conclusion	72

PART-II

Chapter- 4 Analysis

4.1 Channel geometry, hydraulics and load

Introduction	74
4.1.1 Study Reach	75
4.1.2 Materials and methods	76
4.1.3 Cross Profiles	78
4.1.3.1 Symmetrical and Asymmetrical Cross Profiles	86
4.1.3.2 Relationship between Cross Profiles (Channel Shape), Velocity and Turbulence	87
4.1.4 Depth	88
4.1.4.1 Seasonal variation of Water Depth.	88
4.1.4.2 Width- Depth Ratio	89
4.1.5 Steady and Unsteady or Uniform and Non-Uniform flow of water	97
4.1.6 Pattern of Flow	99
4.1.6 Nature of flow	100
4.1.8 Water Discharge	102
4.1.9 Channel Pattern	103
4.1.10 Study on seasonal variation of coarse sediments (>2mm) along the study reach	103
4.1.10.1 Mean sediment size distribution	108

4.1.11 Estimation of Discharge and Sediment output	109
4.1.11.1 Methodology	110
4.1.11.2 Surface Runoff estimation	110
Major Findings	116
Conclusion.	118

4.2 Channel Dynamics

Introduction	119
4.2.1 Study Reach	121
4.2.2 Data and methodology	123
4.2.2.1 Data and image processing	123
4.2.2.2 Delineation of channel boundaries	125
4.2.3 Channel dynamics	126
4.2.3.1 Morphological Dynamics	126
4.2.3.2 Centerline and Bankline Dynamics	127
4.2.3.2.1 Centerline dynamics	131
4.2.3.2.1.1 Channel centerline prediction	140
4.2.3.2.2 Channel Bankline Dynamics	146
4.2.3.2.2.1 Right Bankline Dynamics	146
4.2.3.2.2.2 Left Bankline Dynamics	150
4.2.3.3 Dynamics in Channel Length and active channel area	157
4.2.3.4 Channel width Variation	159
4.2.3.5 Variation in Sinosity, Braiding Intensity and Braid Channel Ratio	163
Major Findings	170
Conclusion	170

4.3 Confluence Dynamics

Introduction	171
4.3.1 Study Area	172

4.3.2 Data and Methodology	174
4.3.3 Description of the confluence dynamics	179
4.3.4 Fluvial mechanisms of Confluence dynamics	180
4.3.4.1 Avulsion	181
4.3.4.2 Aggradation	186
4.3.4.3 River Capture	187
4.3.4.4 Stream Junction Angles	188
4.3.4.4.1 Channel confluence junction angle prediction	190
Major Findings	192
Conclusion	193
4.4 Erosion and Accretion	
Introduction	194
4.4.1 Study Reach	195
4.4.2 Data and methodology	195
4.4.2.1 Delineation of channel boundary	195
4.4.2.2 Determination of erosion and accretion areas	195
4.4.3 Areas of erosion	197
4.4.4 Areas of accretion	197
4.4.5 Annual rate of bank erosion and accretion	198
4.4.6 Spatial and temporal distribution of erosion and accretion along the study reach	199
4.4.7 Accuracy of results	200
Major Findings	201
Conclusion	201

4.5 Role of Tectonics

Introduction	205
4.5.1 Regional setting	207
4.5.2 Data and methodology	207
4.5.3 Geomorphic Indices based on SRTM DEM	211
4.5.3.1 Relief Ratio (R_h)	212
4.5.3.2 Drainage Basin Asymmetry (A_f)	212
4.5.3.3 Basin Shape Index (B_s)	213
4.5.3.4 Hypsometric curve and Hypsometric Integral (HI)	214
4.5.3.5 Stream Length Gradient Index (SL)	216
4.5.3.6 Valley-floor-width to height ratio (V_f)	218
4.5.3.7 Index of mountain front sinuosity (S_{mf})	221
4.5.3.8 Transverse topographic symmetry factor (T)	224
4.5.3.9 Longitudinal profile	225
4.5.4 Combination of geomorphic indices with geology	226
Major Findings	227
Conclusion	229

4.6 Role of Anthropogenic activities

Introduction	231
4.6.1 Sediment Mining	232
4.6.1.1 Thalweg shifting and instability of bars	236
4.6.1.2 Bed elevation changes	237
4.6.1.3 Shifting of pool riffle sequence	238
4.6.1.4 Deformation of channel beds	238
4.6.1.5 Channel planform changes	240
4.6.1.6 Other impacts	240
4.6.2 Bridge Construction	242
4.6.2.1 Surface elevation changes	244

4.6.2.2 Channel migration and planform changes	246
4.6.2.3 Effects on hydraulic and geometric parameters	248
4.6.3 Extension of Embankments	251
4.6.4 Landuse Change	255
4.6.5 Intensive cultivation of channel bars	255
4.6.6 Road Widening	256
4.6.7 Growth in Tourism	257
4.6.8 Coal Mining	259
Major Findings	259
Conclusion	260

PART-III

Chapter -5 Major outcomes and Conclusion

5.1 Major outcomes of the study	261
5.2 Conclusion	266
Summary of the Research work	269
References and Bibliography	276
