

List of Tables

Table 1.1 Details of data used and their sources	16
Table 2.1 Table showing type, characteristics and areal coverage of different soil types in Chel River Basin	41
Table-2.2 Demographic and socio-economic characteristics of the study area (Census, 2011)	45
Table- 2.3 Decadal growth of population in the study area (Census, 2011)	46
Table 3.1 Stream Order, Stream Number and Bifurcation Ratio	54
Table 3.2 Stream Length, and Stream Length Ratio of Chel Basin	54
Table 3.3 Elongation ratio and basin shape	58
Table 3.4 Elongation ratio, Circulatory ratio and Form factor	59
Table 3.5 Drainage density, Drainage frequency and Drainage texture	61
Table 3.6 Infiltration number, Length of overland flow and constant of channel maintenance.	62
Table 3.7 Channel gradient, Relief ratio and Ruggedness number	66
Table 3.8 Morphometric parameters at a glance	71
Table 4.1.1 Width-depth ratio at different cross profiles	90
Table 4.1.2 Channel hydraulic variables measured during Pre-monsoon, 2017	91
Table 4.1.3 Channel hydraulic variables measured during Post-monsoon, 2017	92
Table 4.1.4 Seasonal variation in maximum water depth and surface water velocity along the study reach.	98
Table 4.1.5 Seasonal variation of Froude number and Reynolds number along the study reach.	101
Table 4.1.6 Mean sediment size variability during pre and post monsoon, 2017	109
Table 4.1.7 Sub-Basin wise mean water and sediment outflow	112
Table 4.2.1 Map sources used in the study	124

Table 4.2.2 Statistics of centerline migration dynamics over time	135
Table 4.2.3 The assessment of channel centerline shifting and prediction of channel centerline	143
Table 4.2.4 Statistics of right bank migration over the period 1955 to 2017	147
Table 4.2.5 Statistics of left bank migration over the period 1955 to 2017	152
Table 4.2.6 Reach wise temporal channel length changes from 1955 to 2017	157
Table 4.2.7 Reach wise channel area variation of the Chel River from 1955 to 2017	159
Table 4.2.8 Transect wise temporal variation in channel width	161
Table 4.2.9 Channel width variation at Manabari, Chelkari and Baragharia as representative of Reach A-C respectively from 1955-2017	162
Table 4.2.10 Reach-wise temporal dynamics in planform	166
Table 4.2.11 Temporal variation in Sinuosity and Braiding Index values of entire study reach from 1976-2017	169
Table 4.3.1 Computed values of junction angle variation for Chel-Kumlai and Chel-Neora confluence points during 1955-2017	176
Table 4.3.2 Summary of spatio-temporal channel confluence dynamics, probable reasons and morphological implications	182
Table 4.3.3 The assessment of channel junction angle variation and prediction using linear regression method	191
Table 4.4.1 Area of riverbank erosion along the study reach of River Chel from 1955-2017	197
Table 4.4.2 Area of riverbank deposition along the study reach of River Chel from 1955-2017	198
Table 4.4.3 Mean annual rates of bank erosion and accretion along the study reaches from 1955 to 2017.	199
Table 4.5.1 Geological and Lithostratigraphic units of Chel basin , compiled from Geological and Mineral map of West Bengal, GOI, 1999 and Mitra et al. 2010 and references therein	209
