

M.Sc. 3rd Semester Examination, 2023

BOTANY

*(Plant Physiology. Biochemistry and Molecular
Biology)*

(Practical)

PAPER — 395.2

Full Marks : 25

Time : 3 hours

Answer all questions

The figures in the right hand margin indicate marks

*Candidates are required to give their answers in
their own words as far as practicable*

1. Answer any *two* questions from the following : 8×2
- (a) Determine the percentage of seed viability in the supplied specimens A, B, C, D

and E. Graphically represent and comment on the result. $2 + 4 + 2$
 [Requisition 2, Result 4, Comment 2]

(b) Extract and compare the levels of total chlorophyll in the supplied specimens F, G and H. Graphically represent and comment on the result. $2 + 4 + 2$
 [Requisition 2, Result 4, Comment 2]

(c) Determine the concentration of amino acid present in the supplied samples I and J using ninhydrin reagent with the help of a standard curve. $2 + 4 + 2$
 [Requisition 2, Result 4, Comment 2]

(d) Determine the concentration of carbohydrate present in supplied samples K and L using anthrone reagent with the help of a standard curve. $2 + 4 + 2$
 [Requisition 2, Result 4, Comment 2]

(e) Determine the concentration of protein present in the supplied sample M and N

by Lowry's method with the help of a
standard curve. 2 + 4 + 2
[Requisition 2, Result 4, Comment 2]
