Questions and Suggestions

Professor Sujata Sen:

1. Suggestion - Use the term selection of "cases" instead of using the term "sample" since this is a qualitative work.
2. Make a separate section on relation between migration and HIV cases.
3. Experiences during the pandemic situation can be incorporated.
4. Use the term Analysis/Understanding/Interpretation instead of "Findings" (Label can be given as conclusion and suggestions)
5. Questions: Since the research has attempted at an understanding of stigma in complex social situations, how can you interpret these complex social phenomena as a researcher?
6. Highlight on suggesting policies: How can you as a sociologist help in framing policies in this context?

Professor Ruby Sain:

1. Suggestion: Epidemiology in Medical Sociology should be mentioned
2. Only Goffman's theory on stigma has been accepted and used by you. Also add Sutherland's labelling theory. [Joydeb's/scholar response: Added labelling theory already in research]
3. Add more cases applying snow-ball sampling and undertaking qualitative strategies since 20 respondents is too a less number. [Joydeb's response: Difficult to conduct research on HIV patients in hospital set-up.]
4. Explain the role of governmental and non-governmental agencies in these kind of diseases. Explain the role of WHO as well.

DR. Asmita Bhattacharyya:

1. Suggestion: Objectives should be precise.
2. Question: Why the term "semi-structured" has been used instead of interview guide/schedule considering this is a qualitative research?

(3)

3. Where is the rationale for choosing West Bengal when literature indicated that West Bengal is the least affected area?

4. What is the chapter categorization?

[Joydeb's response: Introduction, Literature review, Research methods. Analytical chapters: a. Understanding of the concept of Stigma; b. Discrimination related to Stigma; Stigma as a social control mechanism; Findings, Limitations, Policy and conclusion]
